One to thirty-four (34) Standard or Restricted Category, Heavy (Type I) or Medium (Type II) Helicopters fully operated, meeting the requirements of this Schedule and the specifications for operation at the host base, and during the periods shown below. Award of helicopters make and model will be based on best value to the Government. The performance requirements are a minimum and the Aircraft will be evaluated for overall best value including price. The Government will determine best value.

It is the intent of this solicitation to secure a Fixed Price with Economic Price Adjustment contract not to exceed 1 base year and 3 option period for the daily availability rate. The flight rate will be an indefinite quantity with no quarantee of flight hours given by the Government. Government may award a single contract or multiple awards hasad on the outcome of the

SECTION B SUPPLIES OR SERVICES AND PRICES

B-2 Bidders May Qualify Their Bids. Bidders shall indicate below the maximum number of items willing to accept.

CHI has Twelve (12) Aircraft for	consideration on this RFP. Ten (10)
of the Twelve (12) Aircraft meet	the qualifications for Items # 11 -
18, and all Twelve (12) Aircraft	for consideration on Items # 19 - 34.

B-3 Aircraft Performance Specifications (Minimum) to be used for proposal evaluation purposes

Aircraft performance shall be based on minimum engine specification. Aircraft performance capabilities shall be determined by using the Standard Interagency Helicopter Load Calculation Method. (Exhibit 13, Interagency Helicopter Load Calculation)

Performance enhancing data (Power Assurance Checks, wind charts, etc) shall not be used and will not be considered for the evaluation of proposals. Only FAA approved charts based on minimum specification engine performance shall be used. As an example, Kaman K-1200

Items 1 through 10

	\$43.00 per hour
B-1	0 Overnight Allowance (Specified)
	Rates as published in Federal Travel Regulations See Section C
B-1	Standard Per Diem Rate (Specified)
i	Rates as published in Federal Travel Regulations See Section C.
B-12	Contractor Furnished Special Requirements (Note: CO check those that apply)
	Weight of the passenger seats will not be included in the equipped weight. ☐ Rappel Capability (Exhibit 17) ☐ Litter Kit with Litter(s) ☐ Wire Cutters if available (Exhibit 5) ☐ FAA Over water Kit (in accordance with 14 CFR Part 91.33 Part b (11)) OVER WATER SPECIALIZED EQUIPMENT REQUIREMENTS DESCRIBED BELOW: Per 14 CFR Part 91.509(b) to include: Life raft(s) capable of transporting all occupants (Maximum seating capability). Personal Flotation Device (MAE WEST) for all occupants. Life raft (s) and personal flotation devices must meet all applicable Federal Aviation Regulations for certification and recertification. ☐ Fixed Suppressant/Retardant Delivery Tank (Exhibit 5) ☐ Fixed Suppressant/Retardant Tank with Self-Filling Capability (Exhibit 5)
	Variable Capacity Collapsible Bucket(s) (Capable of being transported in cabin or baggage compartment or external basket) must meet Section C-4.D.21 requirements Extended Height landing gear applies to type II helicopters with fixed tank only, e.g. cross tubes, similar to DART extended height 39 inch Landing Gear Kit, part number D205-594-011, that insures a minimum of 12 inches clearance between the attached delivery tank and level ground. Dart Extended Height Access Step or equivalent must be provided with minimum of one step half the distance to the skid. If aircraft is standard category and equipped with fixed tank, landing gear configuration must insure a minimum of 12 inches clearance between the attached delivery tank and level ground. (Does not apply to Standard category aircraft offered as limited use)

_	Suppressant/Retardant Mixing Equipment (Exhibit 5) Variable Capacity Collapsible Bucket(s) (Capable of being transported in cabin or baggage compartment or external basket) must meet Section C-4.D.21 requirements Additional Variable Capacity Collapsible Bucket(s)(Capable of being transported in cabin or baggage compartment or external basket) must meet Section C-4.D.21 requirements Digital P25 VHF-FM (FM-1) Transceiver in lieu of Analog VHF-FM (FM-1) Transceiver Must be complied with no later than January 1, 2010. (Only transceivers specified in Section C-8.A.3.g are acceptable) GPS (See Section C-8) Additional VHF-FM (FM-2) Transceiver (In accordance with requirements for a VHF-FM Transceiver in Section C.)
	AFT Cabin audio control system (Use Exhibit 17 for third audio control system specifications) External PA VHF Navigation receiver with indicator (VOR) GPS Data connector (Exhibit 7) Additional GPS Antenna (Exhibit 7) External antenna for Trimble Survey grade GPS unit. Interphone – All passenger positions Additional 760 Channel VHF-AM Radio VHF-FM Portable Radio (for fuel servicing vehicle driver) Fuel Servicing Vehicle Radio (Exhibit 7)
_	Automatic engine re-ignition system Engine air intake filtration system Closed circuit fueling system if commercially available for the helicopter offered (See Exhibit 8). Kit for disposal of fuel during start-up/shut down; i.e., EPA Bell Kit if commercially available Wiring to accommodate Government-Furnished carousel

B-7 – Acceptable Work Schedules

Carson Helicopters, Inc. (CHI) requests a work schedule for all personnel working under RFP AG-024-B-S-08-9003 of 12 days on / 12 days off.

CHI would like to reserve the right to employ personnel during their 12 days off for relief purposes only, provided that person has received a minimum of two (2) calendar days off since their last duty day.

WEB: www.carsonheli.com

EMAIL: admin@carsonheli.com

This will allow CHI to ensure maximum availability under this Contract for Flight Crew and Duty Limitations as outlined in Section C-16.

Steve Metheny

Exec. Vice President

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

- 3. The pilot is responsible for computing the weight and balance for all flights and for assuring that the gross weight and center of gravity do not exceed the aircraft's limitations. Pilots shall be responsible for the proper loading and securing of all cargo. Load calculations (Exhibit 13, Form 5700-17 or OAS-67) shall be computed and completed by the pilot using appropriate flight manual hover performance charts.
- 4. Each helicopter shall operate in accordance with an approved 14 CFR Part 133, Rotorcraft Load Combination Flight Manual (RLCFM), unless the CO specifically waives the requirement. A copy of the RLCFM shall be kept with the aircraft at all times.

B. Standard Category Helicopters

- 1. All passenger-carrying flights, regardless of the number of passengers carried, shall be conducted in accordance with the Contractor's 14 CFR Part 135 operations specifications.
- 2 Helicopters shall be certificated in Normal or Transport Category.
- 3. The Government may elect not to utilize individual Standard Category aircraft for passenger transport.
- 4. Helicopters shall carry their fully rated capacity of cargo for suppressant/retardant as determined by use of the approved weight and balance performance data.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

C-3 Government Furnished Property

- A. If Government Furnished Property (GFP) is provided; the Contractor shall be required to sign a property receipt document. Upon Government request, GFP shall be returned to the Government in accordance with GFP FAR Clause 52.245-1 (JUN 2007).
- B. The Government will deliver the following items to the Contractor upon arrival at the Host Base.
 - 1. Interagency Aviation Transport of Hazardous Materials Handbook/Guide with any applicable Department of Transportation (DOT) Special Permit Letters and Emergency Response Guide.
 - 2. Personal fire shelter for each flight crewmember. Instruction in shelter deployment to be provided by the Helicopter Manager
- C. Foam Concentrate will be provided by the Government as needed in accordance with the most current Qualified Product List as specified at www.fs.fed.us/rm/fire

C-4 Aircraft Requirements

A. General

- 1. Aircraft shall be maintained in accordance with all applicable 14 CFR requirements, mandatory manufacturers' bulletins as required or identified by the FS and or DOI, and all applicable FAA Airworthiness Directives (AD).
- 2. All required documents needed to verify the data in Form FS-5700-21a or AMD 36b; Helicopter Data Record (including airframe logs, engine logs, compliance with mandatory manufacturer's bulletins, FAA AD compliance, and aircraft status record, etc.) shall be made available to FS or DOI inspector(s).
- 3. Unless authorized by an approved Minimum Equipment List (MEL), aircraft shall not be approved or used if any accessory or instrument listed on the aircraft type certificate data sheet is inoperative.
- 4. Aircraft shall not be approved if any component time in service exceeds the manufacturers' recommended Time Between Overhaul (TBO) or FAA-approved extension. All inspection times and intervals shall comply with the Contractor's FAA approved maintenance program.

B.	Condition of Equipment		
(· -		2	
<u></u>			
<u> </u>	. :-		
•	<u> </u>		

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

- All windows and windshields shall be clean and free of scratches, cracks, crazing, distortion, or repairs, which hinder visibility. Repairs such as safety wire lacing and stop drilling of cracks are not acceptable permanent repairs. Prior to acceptance, all temporarily repaired windows and windshields shall have permanent repairs completed or shall be replaced.
- 3. The aircraft interior shall be clean and neat. There shall be no un-repaired tears, rips, cracks, or other damage to the interior. The exterior finish, including the paint, shall be clean, neat, and in good condition (i.e. no severe fading or large areas of flaking or missing paint and etc.). Military or other low visibility paint schemes are unacceptable. Any corrosion shall be within manufacturer or FAA acceptable limits.

C. Center of Gravity

- All aircraft shall be configured so that the center of gravity will remain within the FAA approved Flight Manual published limits for all load requirements and full range of fuel conditions, including ferry with minimum crew without subtraction or addition of ballast.
- 2. All aircraft shall be loaded such that the center of gravity will remain within allowed limit during the flight. Actual weights will be used for flight calculation.

	io mgm. Actual weights will be use	to ingrit calculation.	·	
3. W	<u>/hen the equipped weight of the air</u>	rcraft as noted by registration	n number in Section R

<u>-</u>				

- 9. FAA-approved double-strap shoulder harness with automatic locking inertia reels for each front seat occupant. Shoulder straps and lap belts shall fasten with one single-point, metal-to-metal, and quick-release mechanism. Standard factory shoulder harnesses are acceptable for Aerospatiale and Bell transport category helicopters. Military style harnesses are acceptable. (Exhibit 4, Restraint Systems Condition Inspection Guidelines).
- 10. FAA approved single diagonal shoulder harness with inertia reel integrated with the lap seat belt with one single point metal to metal, quick release mechanism for each passenger position. For aircraft equipped with airline type seats, a single or double FAA approved shoulder harness integrated with seat belt with one single point metal-to-metal quick release mechanism for each passenger position.
- 11. One flight hour meter (Hobbs) installed in a location observable by the pilot and front seat observer while seated. The meter shall be wired in series with a switch on the collective control, and a switch activated by engine or transmission oil pressure or equivalent system, to record flight time (in hours and tenths of hours) only.
- 12. External load operations from other than the manufacturer's designated pilot station (right seat in most helicopters) are allowed only with an approved FAA Supplemental Type Certificate (STC) or field approval and designation on the aircraft Interagency Data Card. For single piloted aircraft, field approvals in lieu of STCs are not acceptable unless operational gauges are installed in a manner which allows observation while the pilot's focus is on the external load.
 - 13. Convex mirror for observation of external loads and landing gear (not required for aircraft equipped ONLY for vertical reference operations).
 - 14. The Fire extinguisher(s) shall be a hand-held bottle, fully charged, with a minimum of 1.5 pounds capacity and 2-B:C rating, maintained in accordance with NFPA 10 and mounted with a quick release attachment accessible to the flight crew while seated.
 - 15. Standard Category helicopters with a floor height greater than 18-inches shall have an approved personnel access step to assure safe entrance and exit from each door of the helicopter. A section of external cargo rack may be utilized as a step by providing a clear space covered with non-skid material.
- 16. Complete set of current aeronautical charts covering area of operation. The Contractor shall be responsible for providing navigation publications.
- 17. Dual controls are required for pilot evaluations.
- 18. One or more independently switched white or white and red strobe light(s) mounted on top of the helicopter or otherwise visible from above.

In accordance with 14 CFR 27.1401, Anti-collision Light System (d) Color. Each anti-collision light shall be aviation red and shall meet the applicable requirements of 14 CFR 27.1397. In order to meet contract specifications, Contractors shall obtain FAA approval (FAA Form 337) to alter the aircraft, if applicable.

19. High visibility markings on main rotor blades (Exhibit 6, High Visibility Markings on Main Rotor Blades).

20. Cargo Hook

- a. One cargo hook that may be loaded and locked in a single motion with one hand, and is rated at the maximum lifting capacity of the aircraft.
- b. As a minimum, the cargo hook shall be completely disassembled and inspected with repairs made as required, lubricated, and a full-load operational check in accordance with manufacturers recommendations.
- 21. Variable capacity collapsible bucket(s) (For bucket-equipped helicopters)
 - a. One (1) collapsible, variable capacity water/retardant buckets shall be furnished under this Contract.
 - b. The bucket, at 100 percent of manufactures rated capacity (+/ -5%) shall be commensurate with the maximum OGE lifting capability of the helicopter at 5000 PA and 30 degrees C with a 200 pound pilot(s) and 1 1/2 hours of total fuel. The bucket shall be capable of being operated with all increments of the long-line. No partial dips allowed.
 - c. Environmental operating conditions may dictate the need for more than one size bucket.
 - d. Helicopters equipped with electronic helicopter hook load measuring system (load cells) that provide a cockpit readout of the actual external load and a bucket that is equipped with a gating system and/or a powerfill bucket that allows part of the load to be released while retaining the remainder of the load are approved in lieu of the second bucket.
 - e. Capacity of each position or adjustment level shall be marked on the bucket. Collapsible buckets with cinch straps shall only be adjusted to the marked graduations (i.e., 90%, 80%, 70%). Attempts to establish intermediate graduations or capacities below the manufacturer's minimum graduation (by tying knots, etc.) are prohibited. Powerfill buckets do not need to be cinched.
 - f. An Operations Manual for the type bucket(s) provided shall be available on site.
 - g. Either the weight of the bucket or capacity at each adjustment level shall be marked on the bucket or the operator shall have a written statement of the maximum capacity (weight) at each adjustment point.
 - h. The jettison-arming switch, if applicable, shall be in the armed position during external load operations.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

i. When a bucket is attached directly to the cargo hook, it is critical to measure the maximum length of the extended bucket from the shackle on the control head to the extended dump valve/fire sock, making sure that it is at least 6-inches less than the distance from the belly hook to the closest possible point on the tail rotor. Lines attached between the cargo hook and the bucket shall extend the bucket past the outside arc of the tail rotor, the line shall be no shorter than 50 feet.

C-5 Aircraft Maintenance

A. General

- 1. The Contractor shall be capable of providing field maintenance support to each helicopter for extended periods during heavy use.
- 2. Helicopters shall be operated and maintained in accordance with 14 CFR requirements and manufacturers' recommendations. Special equipment and/or modification of the helicopter to meet requirements of this contract shall be inspected, repaired, and altered in accordance with 14 CFR requirements and manufacturer's recommendations or engineered data and, if required, be FAA approved. All "time change" components, including engines, shall be replaced upon reaching the factory recommended time, or FAA approved extension if applicable. Aircraft operated with components and accessories on approved TBO extension programs are acceptable, provided the Contractor who provides the aircraft is the holder of the approved extension authorization (not the owner if the aircraft is leased), and shall operate in accordance with the extension.
- 3. FAA, CFR 14, Part 145 Repair Stations, may be used for specific maintenance functions that the repair station is certified for. The aircraft must be returned to service under the repair station certificate, and not under an individual's certificate for the repair station; for example repairman or A&P mechanic. The repair station may not be used in lieu of the carded mechanic required by this contract.
- Compliance with mandatory manufacturers' service bulletins, FAA ADs, and the correction of
 maintenance deficiencies shall be accomplished prior to the start and during the period of Contract
 performance.
- Contract performance may subject the aircraft engine to frequent smoke, sand and dust ingestion.
 All aircraft shall comply with the erosion inspection procedures at the recommended intervals in
 accordance with the engine operation and maintenance manual for the Contracted aircraft.
- 6. All maintenance performed shall be recorded in accordance with 14 CFR 43 and 91 including helicopter time-in-service and hour meter reading.
- 7 A copy of the current maintenance record required by 14 CFR 91 shall be kept with the aircraft.
- Maintenance of aircraft records shall be in accordance with the FAA Advisory Circular (AC) No. 43-9C as revised.
- The Contractor shall immediately notify the CO of any change of an engine, power train, control, or major airframe component and circumstances inducing the change.
- 10. Routine maintenance shall be performed before or after the daily standby or as approved by the CO.
- 11. All inspection times and intervals shall comply with the Contractor's FAA Approved Maintenance Program.
- 12. Inspections shall be performed in a maintenance facility, or in the best field conditions available.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

13. For aircraft on any FAA approved maintenance program, the following applies:

For aircraft on a maintenance program requiring 100 hr inspections: at the beginning of the Mandatory Availability Period there are 50 or more hours remaining prior to the 100-hour inspection, that 100-hour inspection and any required maintenance and subsequent 100-hour inspections may be performed without loss of availability per the requirements in **a** thru **g** below.

OR

Aircraft on an FAA Approved Aircraft Maintenance Programs with other than 100 hr inspections (for example phase or progressive type inspection), and after having flown 50 or more hours following the start of the Mandatory Availability Period, a scheduled inspection or maintenance may be performed without loss of availability per the requirements in a thru f below. From that time, after every subsequent 100 hours of flight (±10%), scheduled inspections or maintenance may be performed without loss of availability per a thru f below.

a. When the 100 hour or other FAA approved maintenance inspection (that occur on a 100 hour flight cycle), is due and the aircraft and flight crew have been released for the day, the contractor will be allowed to perform this scheduled inspection and/or maintenance, up to the end of the following calendar day, without assessment of unavailability.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

- 14. During the MAP, contractor may, with the approval of the CO, elect to use 2 additional non-paid calendar days for the accomplishment of scheduled maintenance. These 2 days need not be consecutive; however they will each be full calendar days. Contractor shall request approval from the CO at least 48 hours prior to the initiation of the additional scheduled maintenance days. Contractor will not be assessed unavailability for performance purposes and will not be paid for the unavailability.
- 15. All weighing of aircraft shall be performed on scales that have been certified as accurate. The certifying agency may be any accredited weights and measures laboratory.
- 16. Helicopter(s) under initially awarded contract(s) under this solicitation shall remain at or below contracted helicopter equipped weight as bid. Helicopters will be allowed 1% above the awarded contracted helicopter equipped weight during the contract option period(s). The aircraft's equipped weight is determined using weight and balance data which was determined by actual weighing of the aircraft within 24 months preceding the starting date of the MAP and 36 months thereafter or following any major repair or major alteration or change to the

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

C: Maintenance Flights

A functional maintenance flight shall be performed following overhaul, repair, and/or replacement

- 3. VHF-FM Transceivers
 - a. One aeronautical VHF-FM radio transceiver (FM-1). The transceiver shall operate from 150 to 174 MHz, permit the operator to program any usable frequency within that band while in flight, provide operator selection of both wide-band (25 kHz bandwidth/5 kHz modulation) and narrow-band (12.5 kHz bandwidth/2.5 kHz modulation) operation by channel for MAIN and GUARD operation. Transceivers shall be set to operate in the analog narrowband mode (typically indicated with a lower case "n") unless local conditions dictate otherwise.
 - b. Carrier output power shall be 10-watts nominal. The transceiver shall be capable of displaying receiver and transmitter operating frequency. Transceivers shall provide both receiver and transmitter activation indicators for MAIN and GUARD. Simultaneous monitoring of both MAIN and GUARD (168.6250 MHz) is required. Scanning of GUARD is not acceptable. GUARD communications may only be used for: emergencies; initial call; recall; and redirection.

h. All VHF-FM transceivers (aeronautical, mobile, and portable) furnished to meet the requirements of this contract must be multimode (P25) digital by January 1, 2010. Only P25 compliant transceivers will be acceptable after this date. Multimode (P25) digital aeronautical VHF-FM transceivers must meet FS/AMD A-19. Visit the following website for a copy of FS/AMD A-19 and a current list of acceptable radios: www.fs.fed.us/fire/niicd/documents.html

Note: There are currently only two radios known to meet the fire P25 digital radio requirement: Northern Airborne Technology's (NAT) NPX136D and Technisonic Industries' TDFM 136. It is anticipated that a majority of operators will delay purchasing P25 digital compliant radios until the January 1, 2010 deadline. NAT and Technisonic rely on third party manufacturers for radio components, and these components may take several months to acquire. NAT and Technisonic have assured us that they will not be able to manufacture a large quantity of P25 radios in a short timeframe. Accordingly, it is highly suggested that all aviation operators place their orders for P25 digital radios as soon as possible to avoid

SECTION C

displayed in Webtracker is current. A username and password are required to access Webtracker. Log on to the AFF website at https://www.aff.gov to request a username and password, or contact the FASD.

g. This clause incorporates Specification Section Supplement available at: https://www.aff.gov/contractspecs with the same force and affect as if they were presented as full text herein.

B. Navigation Systems

One Global Positioning System (GPS). The GPS shall be panel-mounted; located where both the pilot and the co-pilot/observer can clearly view the display; utilize WGS-84 datum; reference latitude and longitude coordinates in the DM (degrees/minutes/decimal minutes) mode; and be powered by the aircraft electrical system. Antennas must have a clear view of the sky. The GPS unit must have the ability for manual entry of waypoints in flight. The GPS shall have a database, updated annually, covering the continental United States. Contractors accepting dispatches to Alaska shall also include an Alaska database in the GPS. Aviation portable GPS units (Garmin GPSMAP 296/396/496 or equivalent) are acceptable provided they use remote antennas, are securely mounted, present information from an overhead orientation (not a drive along the road type), installation approved via FAA Form 337, and meet all previously stated GPS requirements.

C. <u>Transponder/Altitude Encoders</u>

One ATC transponder and altitude reporting system(s) meeting the requirements of 14 CFR 91.215 (a) and (b), 14 CFR 91.413 and be tested and inspected every 24-calendar months as specified by 14 CFR Part 43, appendix F.

D. Static Pressure, Altimeter, and Automatic Pressure Altitude Reporting Systems

The aircraft's static system(s) shall be maintained in accordance with the IFR requirements of 14 CFR 91, and inspected and tested every 24-calendar months as specified by 14 CFR Part 43, appendix E and 14 CFR 91.411.

E. Audio Control Systems

General

1. Standard Category. Two audio control systems (which may be combined in a single unit) shall be installed providing the pilot and observer/co-pilot separate systems. Each system shall provide pilot and observer/co-pilot with separate controls for selection of multiple receiver

Restricted Category. An audio control system shall be provided for the pilot and check/copilot. The system shall provide controls for selection of multiple receiver audio outputs and
transmitter microphone/PTT audio inputs. The system shall also provide separate controls for
adjustment of both Intercommunication System (ICS) and receiver audio output levels.

F. <u>Transmitter Selection and Operation</u>

- 1. Standard Category. Separate transmitter selection controls shall be provided to the microphone/PTT inputs of both the pilot and observer/co-pilot. The system shall be configured so that the pilot and observer/co-pilot may each simultaneously select and utilize a different transmitter (or Public Address (PA) System when installed) via their respective microphone/PTT. Whenever a transmitter is selected, the companion receiver audio shall automatically be selected for the corresponding earphone. Transmitter sidetone audio shall be provided for the user as well as for cross monitoring via the corresponding receiver selection switch on the other audio control system.
- 2. Restricted Category. A transmitter selection control shall be provided for the microphone/PTT inputs of the pilot and check/co-pilot. The system shall be configured so that the pilot or check/co-pilot may select and utilize a transmitter via their microphone/PTT. Whenever a transmitter is selected, the companion receiver audio shall automatically be selected. Transmitter sidetone audio shall be provided for the operator as well as for cross monitoring.

G. Receiver Selection and Operation

- 1. Standard Category. Separate controls shall be provided for both pilot and observer/co-pilot to select audio from one or any combination of available receivers. The aft exit passenger positions (two positions minimum) shall monitor the receiver(s) as selected by the observer/co-pilot unless the aft exit passenger positions have an independent audio control system(s). Aft exit audio control system(s) (if installed) shall provide selected receiver audio to appropriate required aft passenger positions (two positions minimum).
- 2. Restricted Category. Separate controls shall be provided for selection of audio from one or any combination of available receivers.

H. Radios and Systems

As a minimum, the audio control system(s) shall provide for selection of all installed radios and PA systems.

I. Earphones and Microphones

1. Standard Category. The audio system shall be designed for operation with 600-ohm earphones and carbon-equivalent, noise-canceling boom-type microphones (Gentex electret type Model 5060-2, military dynamic type M-87/AIC with CE-100 TR preamplifier, or equivalent). Only the pilot's position may be configured for low impedance (dynamic) operation.

- C. All avionics systems requiring an antenna shall be installed with a properly matched aircraftcertified, broadband antenna unless otherwise specified.
- D. Antennas shall be polarized as required by the avionics system and have a Voltage Standing Wave Ratio (VSWR) less than 2.5 to 1.
- E. Labeling and marking of all avionics controls and equipment shall be clear, understandable, legible, and permanent. Electronic label maker marking is acceptable.
- F. Avionics equipment mounting location and installation shall not interfere with passenger safety, space, and comfort. Avionics equipment will not be mounted under seats designed for energy attenuation. In all instances, the designated areas for collapse shall be protected.

C-10 Operations

A. General

- Regardless of any status as a public aircraft operation, the Contractor shall operate in accordance with their approved FAA Operations Specifications and all portions of 14 CFR 91 (including those portions applicable to civil aircraft) and each certification required under this Contract unless otherwise authorized by the CO.
- 2. A Government representative may inspect the pilot's Interagency Helicopter Pilot Qualification Card for currency before any flight. The Government has mission control and can delay, terminate, or cancel a flight at any time.
- 3. The government recognizes the ever-increasing difficulty operators are encountering in hiring mission-qualified pilots. In response to this situation the government has developed provisions for contractors to conduct "On Contract" pilot operational training. This program has been designed with the intent of providing operational training opportunities to contractors seeking to upgrade pilots into new aircraft, and to provide operational training for pilots with little or no previous natural resource/wildland fire experience. This program contains significant conditions and restrictions. Adherence to these guidelines is critical for success of the program. See Exhibit 19

B. Pilot Authority and Responsibilities

- 1. The Pilot-In-Command (PIC) is responsible for the safety of the aircraft, loading and unloading of occupants and cargo. The pilot shall comply with the directions of the Government, except when in the pilot's judgment compliance will be a violation of applicable federal or state regulations or contract provisions. The pilot has final authority to determine whether the flight can be accomplished safely and shall refuse any flight or landing which is considered hazardous or unsafe.
- 2. The pilot is responsible for computing the weight and balance for all flights and for assuring that the gross weight and center of gravity do not exceed the aircraft's limitations. Pilots shall be responsible for the proper loading and securing of all cargo.

Load calculations (Exhibit 13, Form 5700-17/OAS-67) shall be computed and completed by the pilot using appropriate flight manual hover performance charts.

- 3. Smoking is prohibited within 50-feet of fuel servicing vehicle, fueling equipment, or aircraft.
- 4. After engine(s) shutdown, the pilot may exit the aircraft while the rotor(s) are turning if the Rotorcraft Flight Manual (RFM) allows and the pilot remains within the arc of the rotor(s). The pilot shall coordinate this action with the Helicopter Manager. If not allowed by the RFM, aircraft must be shutdown and rotors stopped for pilot to exit aircraft or change seats.
- 5. Pilot will use an approved 14 CFR 135/121 or appropriate 133 or 137 cockpit checklist for all flight operations.
- 6. Toe-in, single-skid, step-out landings are prohibited.
- 7. Equipment such as radios, survival gear, fire tools, etc., shall be located in or on the aircraft in such a manner as to potentially not cause damage or obstruct the operation of equipment or personnel. All cargo shall be properly secured.
- 8. The pilot shall not permit any passenger in the aircraft or any cargo to be loaded therein unless authorized by the CO.
- 9. Passenger Briefing

10. Flight Plans

Before each takeoff, the PIC shall ensure that all passengers have been briefed in accordance with the briefing items contained in 14 CFR 135. Briefing shall include the following; Personal Protective Equipment (PPE), Shut-Off Procedures for Battery and Fuel, and Aircraft Hazards.

C. IFR/Night Flight

Requires US Forest Service approval.

D. Flights with Cowling(s) or Doors Open/Removed

The Contractor is responsible for removal, reinstallation and security of the doors. All loose items must be secured prior to flight with doors open/removed (velcro is not considered a secure attachment). Flights with cowlings removed are not permitted. The aircraft external registration number shall be displayed in such a manner to not be compromised.

E. <u>Bucket Operations</u>

The following procedure shall be used for all bucket operations:

- Determine allowable payload using the Interagency Helicopter Load Calculation, appropriate HOGE helicopter performance charts, and current local temperature and pressure altitude. Partial dips for performance planning purposes are not authorized.
- 2. At the beginning of the fuel cycle, bucket capacity shall be adjusted so that the bucket, when filled to the adjusted capacity, does not exceed the allowable payload.
- 3. Helicopters equipped with electronic hook load measuring systems that provide cockpit readout of the actual external load and a bucket that is equipped with a gating system that allows part of the load to be released while retaining the remainder of the load is authorized.
- 4. For calculation of the allowable bucket payload use 8.3 pounds per gallon for water. When mixed fire retardant is being delivered by bucket, use the actual weight per gallon of the mixed retardant.
- 5. Bucket capacity at each position or adjustment level shall be marked on the bucket. Collapsible buckets with cinch straps shall only be adjusted to marked graduations (i.e., 90%, 80%, 70%). Intermediate graduations or capacities below the manufacturer's minimum graduation (by tying knots, etc.) are prohibited.
- 6. Buckets shall be attached directly to the beily hook unless the pilot is approved for vertical reference.
- 7. Extension (Tag) lines of less than 50-feet are not permitted for bucket operations
- 8. Aircraft equipped with a tail rotor and conducting external load operations (excluding class A loads) will be limited to an airspeed of 80 knots indicated or the airspeed limitation established by the rotorcraft flight manual, whichever is less. All other aircraft conducting external load operations shall comply with applicable Rotorcraft Flight Manual Limitations.
- 9. When conducting external load operations, rotors will remain above the canopy, or aircraft will operate within an opening no less than 1 ½ times the main rotor diameter (e.g. an aircraft with a 48' main rotor diameter would require a 72' diameter opening).

F. Dual Controls

Dual controls are required and shall be made accessible to an approved agency Helicopter Inspector Pilot (HIP) for all pilot performance evaluations. During flight operations the front seat not occupied by a pilot may only be occupied by a Helicopter Manager, or a briefed and authorized aerial observer.

G. Exemption for Transportation of Hazardous Material (HazMat)

- Helicopters may be required to carry hazardous materials. Such transportation shall be in accordance with DOT Special Permit and the DOI or FS Aviation Transport of Hazardous Materials Handbook/Guide (NFES 1068). A copy of the current Special Permit and handbook/guide and emergency response guide shall be aboard each aircraft operating under the provisions of this Special Permit and can be found at this website: http://amd.nbc.gov/library/handbooks.htm
- 2. It is the responsibility of the Contractor to ensure that Contractor employees have received training in the handling of hazardous materials in accordance with 49 CFR 172. Documentation of this training shall be retained by the company in the employee's records and made available to the Government as required. Training is available at this website: https://www.iat.gov/Training/modules/a110/pre-110.html
- 3. The pilot shall ensure personnel are briefed of specific actions required in the event of an emergency. The pilot shall be given initial written notification of the type, quantity, and the location of hazardous materials placed aboard the aircraft before the start of any project. Thereafter, verbal notification before each flight is acceptable. For operations when the type and quantity of the materials do not change, repeated notification is not required.

C-11 Contractor's Environmental Responsibilities

- A. The Contractor is responsible to ensure that all maintenance, fueling, and flight activities do not cause environmental damage to property or facilities.
- B. The Contractor shall be responsible for all cleanups of fuel, oil, and retardant contamination on airport ramps, retardant sites, parking areas, landing areas, etc., when caused by Contractor aircraft or personnel when cleaning paved areas, the contractor shall utilize cleaning agent that are biodegradable and non-toxic. Contaminated soils shall be removed to appropriate containers and disposed of as hazardous waste.
- C. The Government may, at its option, assign an area to be utilized by the Contractor for storage of equipment used in support of Contract performance. Oil, solvents, parts, engines, etc. shall be stored and utilized in a manner consistent with acceptable safety, health and environmental concerns.
- D. The contractor shall ensure that they are in compliance with 40 CFR Part 112: Oil Pollution Prevention; Spill Prevention, Control, and Countermeasure Plan Requirements (SPCC).

An SPCC plan is required for each mobile fueler used on this contract regardless of bulk storage container (tank) size.

C-12 Personnel

A. General

- 1. Pilots, fuel servicing personnel, and mechanics shall speak English fluently and communicate clearly.
- 2. Only essential crewmembers are authorized on tactical flight missions. The Mechanic and Fuel Service Vehicle Driver are considered non-essential crew members and are not allowed to be onboard the helicopter during tactical flight missions.

B. Pilot Approvals and Qualifications and Background Investigation

- 1. Interagency Pilot Inspectors will verify that Contractor pilots meet the experience and qualification requirements under this contract.
- 2. Each PIC shall, at the discretion of the Government, pass an agency flight evaluation check. The flight check will be in an aircraft supplied by the Contractor at no expense to the Government. The satisfactory completion of the evaluation flight will not substitute for any of the total flight hour requirements listed in this clause.
- 3. Pilots shall complete appropriate portions of the Helicopter Pilot Qualifications and Approval Record (Form FS-5700-20a) prior to helicopter pilot inspector evaluation. When approved, each pilot will be issued an Interagency Helicopter Pilot Qualification Card documenting: Company, make, model and series of aircraft approved to operate and the missions each pilot is approved to perform. Pilot cards are contractor specific and are non-transferable. The regional helicopter inspector pilot, with the concurrence of the national helicopter program manager, will be the final authority in determining the number of aircraft and/or vendors for which the pilot will be carded.
- 4. Upon award the successful bidder will furnish and immediately submit a completed electronic Standard Form (SF) 85P and supporting documents to Immanuel West of the U.S. Forest Service for all pilots operating under this contract. The following information will be required for each pilot to be reviewed:
 - a. Complete name (first, middle, last)
 - b. Date of birth
 - c. Place of birth
 - d. Social security number
 - e. Working contact phone number.
 - f. Contractor email address will be provided

Applicants shall provide the required information to Immanuel West at iwest@fs.fed.us or by fax to (505) 563-9991. Mr. West can be reached at (505) 563-9211. Once the information is received, the applicant will be sent the information needed to access the secure on-line database system so they can complete their SF-85P electronically. A paper version of the SF-85P will not be accepted. Applicants can obtain information about the new investigation process at http://www.usda.gov/da/pdsd/. Costs incurred for background investigations will be recovered by the government for all pilots investigated by issuance of a Bill for Collection

Contract Pilots will be permitted to operate aircraft under the initial contract period while the initial background investigation is being conducted. Contractor Pilots must receive a favorably adjudicated Minimum Background Investigations (MBI) in order to continue operating under this contract. If a pilot fails to meet this requirement that pilot shall be removed from the contract and shall be replaced.

C. Pilot Requirements - General

- 1. Commercial or Airline Transport Pilot (ATP) Certificate with appropriate rating (Rotorcraft-Helicopter) and a valid Class I or Class II FAA Medical Certificate.
- 2. Written evidence for make and model to be flown or 14 CFR 135 Airman Competency Proficiency Check (as applicable FAA Form 8410-3 or equivalent).
- 3. Written evidence of an Equipment Check Endorsement for Restricted Category helicopters by the Chief Pilot (as applicable).

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

D. Pilot Requirements - Experience

Pilots shall have accumulated as pilot-in-command (PIC) the minimum flight hours listed below. Flight hours shall be determined from a certified pilot log. Further verification of flight hours may be required at the discretion of the CO.

1.	All Helicopters	Minimum Experience Flying Hours
•	Total Time	
	Pilot -in-command hours:	
	Total Pilot-in Command (Helicopter) Helicopter, Preceding 12 months Weight Class Make and Model Make, Model Series, and Last 12 Months	
	Make, Model, Series, and Last 12-Months	10
	Piston helicopter operations * Flight hour requirements may be reduced by 50% if the pilot submodule completion of the manufacture's approved pilot ground and flight parameters.	
2.	Additional Special Mission Requirements:	•
	Contract Pilot-in-command	

(as related to the applicable Special Mission approval):	Minimum Experience Fly
Mountain Flying (see 1) Mountain Flying Experience – Make and Model Long Line Vertical Reference (VTR) Experience	10
Annual Long Line VTR Recurrency Training	

1 Mountain Flying - Helicopter Pilot: 200 hours experience operating helicopters in mountainous terrain identified in 14 CFR 95 Subpart B-Designated Mountainous Area. Operating includes maneuvering and numerous takeoffs and landings to pinnacles, ridgelines and confined areas.

E. Pilot - Equipment Proficiency

Pilots shall be required to demonstrate proficiency with all mission equipment.

F. Pilot - Vertical Reference Proficiency

- 1. Pilots may be required to demonstrate this capability during an agency evaluation. (Exhibit 10, Interagency Guidelines for Vertical Reference/External Load Training Standards)
- 2. Vertical reference qualified pilots shall maintain proficiency in vertical reference or external load operations. When active under Contract for a period of 30-consecutive days and no vertical reference activity occurs, the pilot will be provided a 1-hour proficiency flight at Government expense. This will include snorkel operations on tanked aircraft.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

3. The Contractor may be considered unavailable for failure to maintain vertical reference proficiency.

G. Co-pilot Requirements (if applicable)	
Co-pilots/Second-In-Command (SIC) shall meet requirements of operator's certificate. They are not

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

2. Driver(s) shall be experienced in proper fueling procedures and be familiar with the safety equipment installed on the fuel-servicing vehicle.

C-13 Conduct and Replacement of Personnel

A.	Performance of Contract services may involve work and/or residence on Federal property (i.e.,
	National Forests and National Parks, etc.). Contractor employees are expected to follow the rules

C-15 Substitution or Replacement of Personnel, Aircraft, and Equipment

- A. The Contractor may substitute or replace aircraft or equipment equal to or greater than contract awarded performance after receipt of written approval by the Contracting Officer.
- B. Request for substitution shall be made at least 10 (ten) days prior to the proposed exchange, except for unforeseen conditions.
- C. When pilots are exchanged or replaced, training and familiarization costs, including any required flight time up to 3 (three) hours, shall be accomplished at the Contractor's expense. The Contracting Officer will determine the necessary amount of flight time up to 3 hours. This is not intended to affect cross shifting of Pilots that are familiar with the operating area or to affect approved relief pilots.

C-16 Flight Hour and Duty Limitations

- A. All flight time, regardless of how or where performed, except personal pleasure flying, will be reported by each flight crewmember and used to administer flight hour and duty time limitations. Flight time to and from the Host Base as a flight crewmember (commuting) will be reported and counted toward limitations if it is flown on a duty day. Flight time includes, but is not limited to: military flight time; charter; flight instruction; 14 CFR 61.56 flight review; flight examinations by FAA designees; any flight time for which a flight crewmember is compensated; or any other flight time of a commercial nature whether compensated or not.
- B. Various work schedules are acceptable as per Section B. The compliment of contract personnel shall be on the same work schedule however days off may be staggered. (Examples of work schedules are 12 on and 2 off, 12 on and 12 off)

C. Pilots

- Pilot flight hour computations shall begin at liftoff and end at touchdown and will be computed from the flight hour meter installed in the aircraft. All flight hours shall fall within duty hour limitations.
- 2. Flight time shall not exceed a total of 8-hours per day.
- 3. Pilots accumulating 36 or more flight hours in any 6-consecutive duty-days shall be off duty the next day. Flight time shall not exceed a total of 42-hours in any 6-consecutive days. For the purpose of this clause, after any 1-full off-duty day, pilots begin a new 6-consecutive day duty-period, provided during any 14-consecutive day period, each pilot shall have two full days off-duty. Days off need not be consecutive.

- 5. Duty includes flight time, ground duty of any kind, and standby or alert status at any location.
- During times of prolonged heavy fire activity, the Government may issue a notice reducing the
 pilot duty-day/flight time and/or increasing off-duty days on a geographical or agency-wide
 basis.
- 7. Flights point-to-point (airport to airport, heliport to heliport, etc.) with a pilot and co-pilot shall be limited to 10-flight hours per day. (A helicopter that departs "Airport A," flies reconnaissance on a fire, and then flies to "Airport B," is not point-to-point).
- Pilots may be relieved from duty for fatigue or other causes created by unusually strenuous or severe duty before reaching duty limitations.
- When pilots act as a mechanic, mechanic duties in excess of 2-hours will apply as flight hours on a one-to-one basis toward flight hour limitations.
- Relief, additional, or substitute pilots reporting for duty under this Contract shall furnish a record of all duty and all flight hours during the previous 14-days.

D. Mechanics

- 1. Within any 24-hour period, personnel shall have a minimum of 8 consecutive hours off duty immediately prior to the beginning of any duty day. Local travel up to a maximum of 30 minutes each way between the work site and place of lodging will not be considered duty time. When one-way travel exceeds 30 minutes, the total travel time shall be considered as part of the duty day. Note: The above travel time in excess of 30 minutes is considered duty time but is not compensable under standby or extended standby.
- Mechanics will have a minimum of 2 full calendar days off duty during any 14 day period. Days need not be consecutive.
- 3. Duty includes standby, work, or alert status at any location.
- Mechanics may be removed from duty for fatigue or other causes created by unusually strenuous or severe duty before reaching duty limitations.
- The mechanic shall be responsible to keep the Government apprised of their ground duty limitation status.
- 6. When the mechanic serves as the fuel servicing vehicle driver, the more stringent of the duty limitations apply.

E. Fuel Servicing Vehicle Drivers

 It is the Contractors' responsibility to insure that employees comply with DOT Safety Regulation 49 CFR Part 390-399, including duty limitations.

> Amendment 01 Dated April 4, 2008

- 2. Fuel servicing vehicle drivers may be removed from duty for fatigue or other causes created by unusually strenuous or severe duty before reaching duty limitations.
- 3. The fuel servicing vehicle driver will be responsible to keep the Government apprised of their ground duty limitation status.
- 4. Notwithstanding DOT Safety Regulation 49 CFR Part 390-399, the fuel servicing vehicle driver shall have a minimum of two (2) full calendar days off duty during any 14-day period. Off duty days need not be consecutive.

C-17 Accident Prevention and Safety

- A. The Contractor shall furnish a copy of all reports required to be submitted to the Federal Aviation Administration (FAA) by the Federal Aviation Regulations (FAR) that relate to Pilot and maintenance personnel performance, aircraft airworthiness or operations.
 - Examples of these reports are paragraphs 14 CFR part 135.415 Mechanical Reliability Reports and Part 135.417 Mechanical Interruption Summary Reports required of the FAR, 49 CFR Part 830, and FAA Form 8010-4, Malfunction or Defect Report.
- B. Following the occurrence of a mishap, the Contracting Officer will evaluate whether noncompliance or violation of provisions of the contract, the Federal Aviation Regulations applicable to the Contractor's operations, company policy, procedures, practices, programs, and/or negligence on the part of the company officers or employees may have caused or contributed to the mishap. The occurrence of the mishap may constitute default in the performance of the contract. A finding of default under the above cited conditions shall entitle the Government to exercise the right to terminate the contract for cause as provided in the "Contract Terms and Conditions" as stated herein.
- C. The Contractor shall keep and maintain programs necessary to assure safety of ground and flight operations. The development and maintenance of these programs are a material part of the performance of the contract. (See Clause E7 Synopsis of Safety Program) When, in the sole judgment of the Contracting Officer, the safety programs will not adequately promote the safety of operations, the Government may terminate the contract for cause as provided in the "Contract Terms and Conditions" as stated herein.
- D. The Contractor shall fully cooperate with the Contracting Officer in the fulfillment of this clause. The Contracting Officer may suspend performance of this contract work, during the evaluation period used to determine cause as stated above.

C-19 Personal Protective Equipment

A. General Operations

The Contractor shall furnish the following personal protective equipment, be operable and maintained in serviceable condition as per appropriate manufacturer's specifications.

B. Helmets

- Contractor personnel shall wear a flight helmet consisting of a one-piece hard shell made of
 polycarbonate, Kevlar, carbon fiber, or fiberglass that must cover the top, sides (including the
 temple area and to below the ears), and the rear of the head. The helmet shall be equipped
 with a chinstrap and shall be appropriately adjusted for proper fit. The helmet shall be worn
 with the chinstrap fastened.
- Flight helmets currently approved for helicopters are the: SPH-5, HGU-84P, SPH-4B, the HGU-56P manufactured by Gentex, the Alpha 200, Alpha 400 and Alpha Eagle (900) manufactured by Interactive Safety Products and the MSA Gallet LH050 (single inner visor), LH150 (single outer visor) and the LH250 (dual visor-one inner and one outer).
- 3. Helmets designed for use in fixed wing aircraft do not provide adequate protection for helicopter occupants and are not approved for helicopter use.

C. Clothing

- Contractor personnel while flying shall wear long-sleeved shirt and trousers (or long-sleeved flight suit) made of fire-resistant polyamide or aramid material, leather boots and leather, polyamide, or aramid gloves. A shirt with long-sleeves overlapping gloves, and long-pants overlapping boots by at least 2-inches, shall be worn by the pilot(s). Personnel shall not wear clothing made of non fire-resistant synthetic material under the fire-resistant clothing described herein.
- Nomex® or other material proven to meet or exceed specifications contained in MIL-C-83429A may be worn. Currently, the following "other" materials meet this specification:
 - a. FRT Cotton Denim Cloth, MIL-C-24915
 - b. FRT Cotton Chambray Cloth, MIL-C-24916
- 3. Clothing not containing labels identifying the material either by Brand Name or MIL-Spec will not be acceptable.

D. Ground Operations

 While within the safety circle of a helicopter with engine(s) running and/or rotor(s) turning, all Contractor personnel shall wear the following PPE:

		<u>.</u>	Chilms collete farmant ab .				
	•						
				٠,			
					,		
_							
					A		

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

 Maintenance personnel working on running aircraft are exempt from gloves, eye protection (eye protection may be worn at the option of maintenance personnel or company policy), long sleeves, and hardhat requirements.

- Each fuel-servicing driver will be expected to demonstrate knowledge of correct fueling procedures, and fueling and safety equipment installed on the fuel-servicing vehicle. Contractor shall have equipment and personnel to change the filter on the fuel service vehicle as required.
- 7. The fuel service vehicle approval is only an indication that the vehicle meets the additional equipment requirements of this Contract, and in no way indicates that the vehicle meets any requirement of 49 CFR.
- Contractors shall ensure all documentation submitted for pilot approvals has been verified for accuracy and completeness. Pilot evaluations or approvals will not be administered/issued until all required documentation is complete. The documentation referenced in C-20 A. 9 b shall be submitted annually for each pilot needing interagency approval (note; the CO may require additional information and documentation).
- 9. The items described below shall be made available at the pre-use or renewal inspection:
 - a. Certificates/Contract
 - (1) Copy of 14 CFR 133
 - (2) Copy of 14 CFR 135
 - (3) Copy of 14 CFR 137

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

- (6) Copy of current FAR 135 Airman Competency / Proficiency Check. "FAA form 8410-3" for each standard category make and model helicopter the pilot seeks approval in. (Required if operating aircraft listed on the operators 135 Certificate)

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

(16) Equipment Check Endorsement

C-22 Re-inspection Expenses

When re-inspection is necessary because Contractor equipment and/or personnel did not satisfy the initial inspection, or when inspecting substitute personnel and/or equipment subsequent to the initial pre-use inspection, the Contractor may be charged the actual costs incurred by the government in performing the re-inspection. Re-inspections will be performed at a time and location mutually agreed to by the Contractor and CO.

C-23 Inspections During Use

- A. At any time during the Contract period, the CO may require inspections/tests as deemed necessary to determine that the Contractor's equipment and/or personnel currently meet specifications. Government costs incurred during these inspections will not be charged to the Contractor.
- B. Should the inspections/tests reveal deficiencies that require corrective action and subsequent reinspection, the actual costs incurred by the Government may be charged to the Contractor.
- C. When the aircraft becomes unavailable due to mechanical breakdown, the Government reserves the right to inspect the aircraft after the Contractor's mechanic has approved the aircraft for return to service. For items covered under 14 CFR 135.415, the Contractor shall furnish the CO with a completed copy of FAA Form 8010-4, Malfunction or Defect Report, or a Helicopter Association International (HAI) Maintenance Malfunction/Information Reporting Form 9 (as applicable).

C-24 Contract Period and Renewal Option

The Contract period shall extend from date of the award through April 30, 2009. However, at the option of the Government, the Contract may be renewed for additional 1 year option periods not to exceed three option periods, provided that the CO serves notice of intent to renew at least 60-days prior to Contract expiration. The renewal will be with the same terms and conditions. Availability shall be offered for base year and each optional renewal period (See Section B, Schedule of Items); however, the non fuel portion of the Government established flight rate will be subject to the provisions of Section D, Economic Price Adjustment Clause.

C-25 Mandatory Availability Period (MAP) Including Extended and Optional Use

- A. MAP will begin on the date stipulated in the Schedule of Items unless:
 - 1. The Government fails to award the contract at least 10 days prior to the established start date

Or

- 2. By mutual consent, a new starting date is established. When a new starting date is established, the number of net days in the MAP will remain the same.
- B. Extended Use. The MAP may be extended on a day-to-day basis either prior to the starting date or subsequent to the ending date set forth in the Schedule of Items provided that no break in service occurs and that such extension is agreed to by both parties in writing prior to extension and that all terms, conditions, and specifications contained in this contract apply.

- C. During the MAP and any extensions thereof, availability is required 14 hours each day beginning at start of morning civil twilight unless otherwise specified by the Contracting Officer. Contracts requiring night capability require 24-hours per day availability.
- D. Optional Use. When a break in service occurs, outside of the MAP or extended use, the aircraft may be hired under the optional use period clause. (Payment will be in accordance with C-34, Payment for Service in the Optional Use Period.)

C-26 Daily Availability Requirements

- A. <u>Equipment</u>. The aircraft and related equipment will be available 14 hours per day and will not be removed from the host base without the approval of the Contracting Officer.
- B. Personnel. Personnel will be in one of the following categories of availability:
 - Standby: Personnel will be on Standby status each day. The beginning of the Standby period will be set by the CO and may be adjusted from day-to-day. Once Standby begins, the standby period will continue for 9 consecutive hours regardless of the payment status of the aircraft. During the Standby period, with the exception of the first 30 minute period to accommodate preflight, the personnel/aircraft shall be able to respond to a dispatch within 15-minutes unless an alternate response time is established by the CO.
 - 2. Extended Standby (that period over 9 hours per day per authorized crew member) is not intended to compensate the Contractor on a one-to one basis for all hours necessary to service and maintain the aircraft, nor is it paid while crew is traveling to and from place of lodging. Extended standby must be specifically ORDERED and documented on the Flight Use Invoice by the Government and only in unusual circumstances will the Government compensate the Contractor for extended standby when aircraft is not also available for immediate dispatch. Extended Standby is not applicable to double-flight crews. Extended

5. Additional maintenance days for scheduled maintenance. During the MAP, contractor may, with the approval of the CO, elect to use 2 additional non-paid calendar days for the accomplishment of scheduled maintenance. These 2 days need not be consecutive, however they will each be full calendar days. Contractor shall request approval from the CO at least 48 hours prior to the initiation of the additional scheduled maintenance days. Contractor will not be assessed unavailability for performance purposes and will not be paid for the unavailability.

C-27 Unavailability

- A. The Contractor will be considered to be "Unavailable" whenever equipment or personnel are unable to perform or fail to perform the requirements of this Contract. Also the aircraft will be considered unavailable when the pilot, mechanic, or fuel servicing vehicle driver cannot perform because of duty limitations unless a relief crew is provided as per Section B. Unavailability however, will not be assessed when pilot(s) has reached flight and/or duty limitations while performing under this Contract when the conditions in C.16 Flight and Duty Limitations occur.
- B. The Government may exercise its right to terminate for cause if there is unavailability in excess of three (3) full, consecutive calendar days (not to include the two approved scheduled maintenance days) or occurrence of unavailability during ten (10) percent of the total days in the Mandatory Availability Period
- C. Unavailability status will continue until the deficiency is corrected. It is the Contractor's responsibility to inform the CO whenever the equipment or personnel become available. Inspection by the Government after a performance failure has occurred will be made as promptly as possible after the Contractor has given notice that the deficiency has been corrected. When Inspection reveals that the failure has been corrected, the Contractor will be considered in "Available" status from the time the Contractor gives notice to the Government that the deficiency has been corrected. If consistent failure to respond to dispatches occurs, the CO retains the right to require check flights at Contractor's expense.

actual clos	f Unavailability will be accumulated	ror the day and posted on the	rilight Use invoice as

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

C-30 Payment Procedures

- A. All flight time, daily availability and other authorized charges or deductions shall be recorded on a flight use invoice in Aviation Business System (ABS). At the end of each day data shall be entered and reviewed by the Government and the Contractor's Representative.
- B. Approved invoices will be packaged electronically for payment on a semi-monthly basis for submission through the ABS process and electronically forwarded to the contractor for review and approval. Corrections shall be returned electronically to the designated representative for resolution. Upon approval, the package will be electronically forwarded to the Albuquerque

C-34 Payment for Service in the Optional-Use Period

- A. Daily Availability Rate plus Specified Flight Rate Method
 - 1. The Contractor will be paid for availability and flight in accordance with C-31, Payment for Flight and C-32, Payment for Availability.
 - 2. Unavailability will be deducted in accordance with C-27, Unavailability.
 - 3. Any additional payments will be made in accordance with C-44, Miscellaneous Costs to the Contractor.

OR

- B. Optional-Use Hourly Flight rate Method
 - 1. The Contractor will be paid at the optional-use hourly offered price for the actual hours flown or a minimum of 2 (two) hours per day, whichever is greater.
 - 2. If the aircraft becomes unavailable, actual flight time will be paid. The 2-hour minimum does not apply in this case.
- C. Ferry time of aircraft to and from the point of hire from the Contractor's base of operations or current aircraft location, whichever is closer, will be paid at the applicable flight rate. If a fuel servicing vehicle is required, mileage to and from the point of use from the Contractor's base of operations or current location that the fuel servicing vehicle is stationed, whichever is closer, will be paid at the rates stipulated in C-39, Payment for Fuel Servicing Vehicle Mileage.

C-35 Payment for Additional Aircraft and Personnel

A. When additional aircraft and/or personnel are ordered by the Government, the Contractor materials them if profibble. All torres and assetting a feet to the contractor materials the contractor materials and assetting a feet to the contractor materials.				
				
-	1,0			
*				
	<u> </u>			
			_	
1	. <u>-</u>			•
-				
		-		<u> </u>

- D. In addition to the \$500 per day, an overnight allowance will be paid when authorized. Extended standby does not apply to additional crewmembers ordered under this clause.
- E. Payment of necessary and reasonable transportation costs to and from the location of the aircraft is authorized. Itemized receipts shall support claims for reimbursement and shall be kept on file by the contractor. Copies of receipts shall be provided to the government upon request.

C-36 Reimbursement for Mobilization and Demobilization Costs

The Contractor is responsible for all mobilization and demobilization costs to the initial host base and from the final host base location. When the initial dispatch is to an alternate base, the Government shall be entitled to the equivalent of one round trip at no cost from the Contractor's home base to the initial host base and return from the final host base.

C-37 Payment for Substitute/Replacement Aircraft

When substitute or replacement aircraft are approved for use by the Contracting Officer, the following payment terms will apply:

- A. Availability The same rate applicable to the aircraft that is being substituted or replaced.
- B. Flight The rate applicable to the make, model, and series of the substitute or replacement aircraft.

-38 Meals

No charge will be made for meals furnished by the Government.

C-39 Payment for Fuel Servicing Vehicle Mileage

Mileage for the fuel-servicing vehicle will be paid when it is dispatched by the Government to give service support to helicopters away from the host base as follows:

- \$3.51 per mile where the carrying capacity of aircraft fuel is 1,500-gallons or more
- \$2,45 per mile where the carrying capacity of aircraft fuel is at least 750 gallons to 1,499 gallons
- \$1.83 per mile where the carrying capacity of aircraft fuel is at least 350 gallons to 749-gallons
- \$ 1.35 per mile where the carrying capacity of aircraft fuel is less than 350-gallons

C-40 Payment for Fuel Transportation

- A. The Government will reimburse the Contractor for costs incurred in transportation of helicopter fuel to sustain Government operations under the following conditions:
 - When Contractor's fuel servicing vehicle cannot travel to an assigned alternate base of operations due to lack of road access.
 - When Contractor has to arrange for fuel support at an assigned alternate base of operation to provide a supply for helicopter flights until the Contractor's fuel-servicing vehicle arrives on site.
- B. The CO will designate the method of transportation and the gallons to be transported.
- C. When the CO orders the Contractor to transport fuel by air, the flight time required to transport the fuel will be paid at the Contract flight hour rate.
- D. When the CO orders transportation of fuel by commercial carrier, reimbursement will be based on supporting itemized paid receipts and provided to the CO, upon request.
- E. In the event the Government furnishes fuel to the Contractor, fuel cost will be charged based upon rates at the nearest accessible point fuel is commercially available. Such fuel costs will be deducted from any sums otherwise due the Contractor on the Flight Use Invoice.

C-41 Payment for Foam Concentrate

- A. Payment for approved foam concentrate, when ordered by the CO and furnished by the Contractor, will be made on an actual cost basis. Supporting itemized paid receipts will be provided to the CO upon request...
- B. Any foam concentrate provided by the Contractor shall be on the list of Approved Foam Products found at the following website: www.fs.fed.us/rm/fire.

C-42 Payment for Costs Away from the Host Base

- A. When Contractor's aircraft is dispatched away from the host base, the Government will authorize payment for <u>additional necessary and reasonable</u> costs involved in transporting authorized relief crewmembers to and from alternate bases when approved in advance by the Contracting Officer. These costs are limited to the actual transportation of the individual; i.e., airplane tickets, car rentals, etc. Salary costs for the Contractor's employee(s) while in travel status is not a cost for which the Government will reimburse the Contractor.
- B. The Contractor will be reimbursed for the difference between the normal cost of transportation from the CONTRACTOR'S BASE OF OPERATIONS to the HOST BASE and the CONTRACTOR'S BASE OF OPERATIONS to the ALTERNATE BASE.
- C. Prior to the Mandatory Availability Period the Contractor shall provide the Contracting Officer with a written statement that itemizes the normal cost of transportation from the Contractors Base of Operations to and from the host base.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

- D. If the Government does not authorize such payment, no deduction will be made for unavailability incurred because of personnel duty limitations. See Section B.
- E. Payment of necessary and reasonable transportation costs to and from the location of the aircraft is authorized. Itemized receipts must support claims for reimbursement and must be kept on file by the contractor. Copies of receipts shall be provided to the government upon request.

C-43 Payment for Overnight Allowance

A.	Overnight allowance will be paid equal to the current standard maximum rate that is allowed (or
	high rate, if applicable) as established by the Federal Travel Regulation (FTR) for each authorized
	grow member for every right assigned to an alternate base or at its option may provide meals/and

 Payment of actual lodging amount and M & IE rate not to exceed the maximum FTR rate PLUS lodging tax. Itemized receipts must support claims for reimbursement and must be kept on file by the contractor and made available to the CO upon request.

C-44 Miscellaneous Costs to the Contractor

- A. Housing, subsistence, ground transportation, and other expenses will be the responsibility of the Contractor or its employees at the Host Base.
- B. The Government will reimburse the Contractor for any airport use costs the Contractor is required to pay when ordered to operate from an airport other than the host base such as airport landing fees, tie-down charges, or other similar type costs.
- C. Miscellaneous unforeseeable costs not recovered through the contract payment rates and are the direct result of ordered service may be reimbursed at actual cost if approved by the Contracting Officer. Examples of this are truck permits at ports-of-entry when the fuel servicing vehicle must cross state lines in fulfillment of ordered services or State use taxes imposed on equipment brought into the state.
- D. Itemized receipts must support claims for reimbursement and must be kept on file by the contractor and made available to the CO upon request.

C-45 Definitions

As used throughout this contract, the following terms shall have the meaning set forth below:

Additional Personnel Additional personnel specifically ordered by the CO where it is to the Government's advantage to have additional availability of the aircraft (not to be confused with a relief crew furnished by Contractor to replace primary crew).

Aircraft Accident An occurrence associated with the operation of an aircraft, whi	ich takes nlace

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

propellers, wheels, tires, wing tips, flaps, etc., or an injury is incurred requiring first aid or medical attention.

Hazard Any condition, act or set of circumstances that exposes an individual to unnecessary risk or harm during aviation operations.

Helitanker An aerial delivery system that is a helicopter configured for the dispensing of fire retardant or fire suppressant material. Airtanker Board criteria shall apply to helicopters with a minimum capacity of

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

<u>Long-line</u> Any combination of load and line, attached to the cargo hook of the aircraft for the purpose of carrying an external load greater than 50 feet in length.

Maintenance Deficiency An equipment defect or failure which affects or could affect the safety of operations, or that causes an interruption to the services being performed

<u>Mishap</u>, <u>Aviation</u> Mishaps include aircraft accidents, incidents-with-potential, aircraft incidents, aviation hazards and aircraft maintenance deficiencies.

<u>Mountain Flying - Helicopter Pilot</u>: 200 hours experience operating helicopters in mountainous terrain identified in 14 CFR 95 Subpart B-Designated Mountainous Area. Operating includes maneuvering and numerous takeoffs and landings to pinnacles, ridgelines and confined areas.

Night The time between the end of evening civil twilight and the beginning of morning civil twilight, as published in the American Air Almanac, converted to local time.

Occupant: Any crew or passenger that is aboard an aircraft.

Official Sunset and Sunrise The times when the upper edge of the disk of the Sun is on the horizon, considered unobstructed relative to the location of interest. Atmospheric conditions are assumed to be average and the location is in a level region on the Earth's surface.

<u>Rappeller</u> A person who has been trained and certified to rappel from a helicopter, in accordance with agency specified policy and direction contained in the Interagency Helicopter Rappelling Guide.

<u>Rappel Spotter</u>. A person who has been trained and certified, in accordance with agency-specified policy and direction contained in the Interagency Helicopter Rappel Guide, to direct and manage a rappel operation

Restricted Category An aircraft that has been manufactured in accordance with the requirements of and accepted for use by an Armed Force of the United States and later modified for special purposes such as agriculture, forest and wildlife conservation, aerial surveying, patrolling, or any the operation specified by the FAA Administrator.

SAFECOM Use to report any condition, observance, act, maintenance problem, or circumstance, which has potential to cause an aviation related mishap. The purpose of the SAFECOM form is not

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

<u>Substantial Damage</u> Any damage or failure which adversely affects the structural strength, performance or flight characteristics of the aircraft, and which would normally require major repair or replacement of the affected component. Engine failure or damage limited to an engine if only one engine fails or rotor or propeller blades and damage to landing gear, wheels, tires, flaps, engine accessories, brakes, or wing tips are not considered "substantial damage" for the purpose of this part.

Type I (Heavy) Helicopter. 15 or more passenger seats or 5,000 lbs payload and 700 gallons retardant capacity

Type II (Medium) Helicopter Between 9 to 14 passenger seats or 2,500 to 4,999 lbs payload and 300 to 699 gallons retardant capacity.

Type III (Light) Helicopter Between 4 to 8 passenger seats or 1,200 to 2,499 lbs payload and 100 to 299 gallons retardant capacity.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

EXHIBIT 3 ALASKA SUPPLEMENT

The following provisions shall apply when operating in Alaska. All other provisions not expressly changed herein continue to apply.

NOTE: Contractors from the lower 48 dispatched to Alaska need to have insurance coverage for Alaska, in addition to having Operations Specifications that permit Alaska operations.

(1) SECTION C, General Equipment

Additional Equipment:

- A. One set of approved Tundra Boards or Snow Pads with accompanying FAA certification.
- B. Complete set of current aeronautical charts and navigation publications covering areas of operation within Alaska and Canada.
- C. Survival kit;

All aircraft will carry survival equipment. Survival kits will contain at least the following items and additional items required by local regulation as is appropriate for local climate and terrain conditions.

The minimum equipment to be carried during the summer months:

EXHIBIT 3 ALASKA SUPPLEMENT (Cont)

The appropriate type of fuel (Avgas or Jet fuel), in one of the following grades, will be available at each location:

AVGAS JET FUEL 100 Jet A 100LL Jet A-50 Jet B

Jet-4 or JP-5 or JP-8

All lubricating oil, parts, and supplies shall be furnished and transported by the Contractor to the assigned work location.

The Contractor shall furnish for each aircraft a portable hand or electrically operated fuel pump, barrel stem, hoses, and filtration system for refueling in remote areas.

The filtration system shall include a unit that accomplishes water separation with positive shut-off. The size of the filtration system unit shall be compatible with pump size. One acceptable three-stage unit is FACET part number 050971. If this model FACET is used, the third stage monitor should be a Velcon part number CDF-210K that is rated to 10 GPM. Also acceptable are Velcon filter spin on 5 micron cartridges, part number 40505SP, rated to 13 GPM; or Velcon VF-31 with 1 micron cartridge element, part number ACO-21005B, rated to 15 GPM. All filtering components shall be changed annually or sooner if needed, and the date of the change shall be placarded on the canister.

he Contractor shall furnish two complete spare filter changes.

AVAILABILITY OF MECHANICS -

The mechanic shall be present for all operations in Alaska. The mechanic shall accompany the helicopter to any assigned work location. The cost of the mechanic shall be included in the Daily Availability Rate.

(2) SECTION C Payment for Availability

Operations in Alaska will be scheduled by the Government in accordance with flight time/duty time limitations. The schedule will not exceed:

SINGLE CREW: Maximum 14 hour per day PIC, or PIC and SIC.

DOUBLE CREW: Maximum 24 hours per day.

Measurement of availability will be reduced, as specified below, for each hour or portion thereof service is listed as unavailable to the Government. Single or double crew Periods of Unavailability will be accumulated for the day and posted on the Flight Use Invoice as actual clock unavailability. There will no longer be a need to round to the nearest quarter hour or reduce unavailability by 1/56.

Availability, as measured above, will be paid at the applicable rate appearing in the Schedule of Items

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

EXHIBIT 3 ALASKA SUPPLEMENT (Cont)

- (3) Payment for Extended Standby is applicable for Alaska assignments.
- (4) SECTION C, Transporting of Relief Crew

If ordered by the Government, the Contractor shall be reimbursed for the cost incurred in delivering

EXHIBIT 4 RESTRAINT SYSTEMS CONDITION INSPECTION GUIDELINES

- A. Federal Aviation Regulations require that occupant restraints systems are to be replaced in aircraft manufactured after July 1, 1951; such systems shall conform to standards established by the FAA. These standards are contained in Technical Standard Order TSO-C22. Restraint system eligible for installation in aircraft may be identified by the marking TSO-C22, TSO-C114 on the webbing, or by a military designation number since military systems comply with the strength requirements of the TSO. Aircraft manufacturer installed restraint systems with part numbers are acceptable. Each system shall be equipped with an approved metal-to-metal latching device.
- B. Federal Aviation Regulations provide minimum inspection guidance, other than to state, that mildew and fraying may render the restraint system un-airworthy and that suspected webbing should be tested for tensile strength. The tensile strength requirement for a single person system is 525 pounds (most systems are rated at 1,500 pounds).
- C. Unacceptable Condition Criteria:

00.10.110.11			
We bridge	us no confessions		95045KW
Frayed (5%) Torn Crushed Swollen Creased Deteriorated	Inoperable Damaged Corroded Excessive Wear	Broken Excessive Wear Missing	Missing Illegible

D. References:

EXHIBIT 5 ADDITIONAL SUPPRESSION/PRESCRIBED FIRE EQUIPMENT

A. Fixed Suppressant/Retardant Delivery Tank with Self-Filling Capability

One (1) externally mounted baffled, quick-disconnect (45-minutes) fixed suppressant/retardant delivery tank that meets or exceeds the following specification:

Capacity commensurate with the maximum related lifting capability of the helicopter equipped with the tank at sea level on a standard day.

NOTE: ALL CONTROLS FOR TANK SYSTEM SHALL BE LABELED AS TO FUNCTION

1 <u>Door(s)</u>

The Tank door(s) shall be designed such that:

- a. The frontal area of the retardant column is minimized.
- b. The door(s) does not appreciably deflect the retardant when fully opened.
- c. The tank and doors shall be leak proof, i.e. ½ gallon or less in a 24-hour period
- d. The doors shall be closeable in flight if the aircraft is not capable of landing with the door(s) open without damaging the door(s).

2. Venting

- a. The tank shall be vented so that no more than 0.25 PSI negative pressure will be created in the tank head space during the fastest drop sequence.
- b. The vent shall not leak during filling or normal flight maneuvers.

3. Fill Port(s)

- a. The fill port shall be a 3-inch Kamlock ® fitting (male) and shall be located on the right and left side of the aircraft.
- b. The fill port shall not leak or overflow during ground operations or during normal flight maneuvers.

Note: For hower draft operations, fill needs are not required	
P	

EXHIBIT 5 ADDITIONAL SUPPRESSION/PRESCRIBED FIRE EQUIPMENT (Cont)

- c. All tanks shall be equipped with an independently controlled and operated emergency dump system enabling the entire load to be dropped in less than 6-seconds. This system shall use mechanical, pneumatic, or fluid pressure for operation.
- d. Emergency systems operated by pneumatic or fluid pressure shall be isolated from the normal tank system pressure. Normal function or failure of the normal system shall not affect the emergency system pressure. Emergency systems dependent on normal operating aircraft or tank systems for initial charge shall have a pressure gauge or indicator readily visible to the crew. Emergency systems dependent on precharged bottles shall have a positive means of checking system charge during preflight.
- e. The primary emergency dump control shall be positioned within easy reach of the pilot and copilot while strapped in their respective seats. Electrically operated controls shall be wired direct to a source of power isolated from the normal aircraft electrical bus and protected by a fuse or circuit breaker of adequate capacity.

5. Certifications

- a. The aircraft will be certificated in the normal or transport category except when restricted operations are authorized by the CO.
- b. Weight and balance computations shall be made with the tank full, empty, and removed,

EYLBDIT # <u>-</u>)

C. Additional equipment offered shall meet the following requirements:

- 1. Power source for a Helitorch or remote cargo hook.
 - a. An MS 3101A-24-11S, 9-pin connector shall be provided. Pin D shall be airframe ground. Pin E shall be switched 28VDC, protected by a 50 amp circuit breaker that can be manually opened and reset. The water bucket open switch shall also activate this circuit.
 - b. The connector shall be mounted adjacent to the cargo hook (within 12 inches). A wire rope lanyard or other similar device shall be provided for support of the connector so that tension loads will not be placed on the electrical wiring.
 - c. This connector has multiple circuit capacity sufficient to provide power and control for Contractor-furnished equipment such as the required water bucket. Water buckets shall be wired through this connector.

Notes:

- i). See FS/AMD A-16 for a 9-pin wiring diagram for suppressant/retardant buckets (See: www.fs.fed.us/fire/niicd/documents.html)
- The 9-pin connector is required on Type II (Medium) Exclusive Use helicopters and all Tyne III (I inht) halicontare Docusions the A ale

family of rope fibers including brand names such as Spectra® by Allied Signal or fibers with similar properties.

- (2) Rope Diameter. Minimum rope diameter shall be 1/2-inch
- (3) Working or Rated Load
 - A. The working or rated load of a rope is the maximum static load that will be lifted by the rope. Working loads are based on a percentage of the approximate breaking or ultimate strength of the rope when new and unused. The working load shall be appropriate to the lifting capability of the helicopter.
 - B. For reference, lifting capability for each category of helicopter is as follows:

Type I (Heavy) 8000 to 30,000 lbs or greater

Type II (Medium) 1600 lbs to 4500 lbs Type III (Light) 750 lbs to 1600 lbs

(4) Factor of Safety

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

EXHIBIT 7 ADDITIONAL AVIONICS EQUIPMENT

Additional avionics equipment specifications when identified as a requirement in Section B.

These Optional Items, if furnished by the contractor, shall meet the following specifications:

A. GPS Data Connector

Standard Category Type II (Medium) & Type III (Light): One GPS Data Port Connector. A GPS data port connector shall be installed for the purpose of external data retrieval by a GIS laptop computer. The connector shall be a DB-9F type D sub-connector shall be wired for RS-232C.

EXHIBIT 7 ADDITIONAL AVIONICS EQUIPMENT (Cont)

Note: It is highly recommended that a programming "cheat sheet" accompany the fuel servicing vehicle.

D. VHF-FM Portable Radio

- 1. A VHF-FM two-way portable radio operating from 150 MHz to 174 MHz. The radio shall provide selection of either wideband (25.0 kHz) or narrowband (12.5 kHz) channel spacing on each channel. The radio shall be frequency-synthesized, equipped with a CTCSS sub-audible tone encoder having a minimum of 32 selectable tones meeting the current TIA/EIA-603 standard, and develop a minimum of 1 watt nominal output power but no more than 10 watts nominal output power. Modified or Family Service Radios (FSR) are not acceptable.
- Transceivers shall be set to operate in the analog narrowband mode unless local requirements dictate otherwise. All radios must have the ability to be programmed in the field by the radio operator without the aid of a computer or the services typically found in a radio shop.
- 3. When the above Fuel Service Vehicle Radio requirement is met with the use of a VHF-FM portable radio with output power booster, that portable VHF-FM radio may be used to comply with this section as long as the portable radio complies with all specified VHF-FM Portable Radio requirements. The VHF-FM portable radio used in the fuel service vehicle must be removable and still operate as a portable radio.
- 4. At least two fully charged batteries per radio are required at the beginning of each shift. The contractor supplied batteries must operate the portable radio throughout the shift. It is highly recommended that all portable radios utilize an AA alkaline battery clamshell. A source of 115 VAC power may not be available for rechargeable batteries.
- All VHF- transceivers (aeronautical, mobile, and portable) furnished to meet the requirements of this contract must be multimode (P25) digital by January 1, 2010. Only P25 compliant transceivers will be acceptable after this date.

Note: It is highly recommended that a programming "cheat sheet" accompany the VHF-FM portable radio. Additionally, the radio should have a carrying case or chest pack carrier and utilize AA batteries

Amendment 01 Dated April 4, 2008

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

EXHIBIT 8 FUEL SERVICING EQUIPMENT REQUIREMENTS

A. General

- An approved fuel servicing vehicle (FSV) (truck, pump-house, or trailer) shall be provided with each helicopter. The FSV shall be inspected annually and shall be stationed at the Host Base unless dispatched by the Contracting Officer. Vehicle shall display a current USFS or USDI-AMD inspection sticker.
- 2. The fuel-servicing vehicle shall be capable of transporting fuel over rough mountainous terrain to include grades of up to 9%.
- 3. Fuel tank/chassis combinations which are not compatible and/or that exceed the gross vehicle weight rating (GVWR) when tank(s) are full are not permitted.
- 4. Fuel servicing vehicles shall be properly maintained, cleaned, and reliable. Tanks, plumbing, filters, and other required equipment shall be free of leaks, rust, scale, dirt, and other contaminants. Trailers used for storage and transport of fuel shall have an effective wheel braking system.

EXHIBIT 8 FUEL SERVICING EQUIPMENT REQUIREMENTS (cont)

B. Equipment

- Each aircraft fuel servicing tank vehicle shall have two fire extinguishers, each having a rating of at least 20-B: C with one extinguisher mounted on each side of the vehicle. Extinguishers shall comply with NFPA 10 Standards for Portable Fire Extinguishers.
- 2. Fuel tanks shall be designed to allow contaminants to be removed from the sediment settling area.
- 3. Only hoses compatible with aviation fuel shall be used for servicing. Hoses shall be kept in good repair. The hose shall be at least 50 feet in length, minimum of ½ the rotor diameter plus 20 feet for rapid refueling.
- 4. Fuel nozzle shall include a 100-mesh or finer screen, a dust protective device, and a bonding cable with clip or plug. Except for closed circuit systems, no hold-open devices will be permitted.
- An accurate fuel-metering device for registering quantities in U.S. gallons of fuel pumped shall be provided. The meter shall be positioned in full view of the fuel handler while fueling the helicopter.
- 6. Fuel servicing vehicle shall have adequate bonding cables.
- 7. Fuel servicing vehicles shall comply with DOT and EPA requirements for transportation and storage of fuel, and shall carry sufficient spill response materials to absorb or contain up to 5-gallons of petroleum product spillage and shall have access to spill response resources for spills greater than 5 gallons. The Contractor is responsible for proper disposal of all products used in the cleanup of a spill in accordance with the EPA, 40 CFR 261 and 262.

C. Markings

- 1. Each fuel-servicing vehicle shall have "NO SMOKING" signs with 3-inch minimum letters visible from both sides and rear of vehicle.
- 2. Each vehicle shall also be conspicuously and legibly marked to indicate the nature of the fuel. The marking shall be on each side and the rear in letters at least 3 inches high on a background of sharply contrasting color such as Avgas by grade or jet fuel by type. Example: Jet-A white on black background.
- 3. All fuel-servicing vehicles shall be placarded in accordance with 49 CFR 172.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

D. Filtering System (Three-Stage or Single-Stage is acceptable)

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

d. Fuel shall pass through a filtering system in accordance with the filter manufacturer's recommendations.

2. Rapid Refueling

a. There are two approved methods (CCR and Open Port) for fueling helicopters with engine(s) running.

EXHIBIT 8 FUEL SERVICING EQUIPMENT REQUIREMENTS (Cont)

- b. Drain all filter/separator drain valves and check for water and other contaminants. Draw off any accumulation of water.
- c. Draw off a sample from the fuel nozzle. Sample shall be collected in a clean, clear glass jar and examined visually. Any visual water, dirt, or filter fibers are not acceptable.
- 2. During Helicopter Fueling Process
 - a. Check sight gauge for water, if equipped
 - b. Visually inspect fueler for leaks. Repair as necessary.
- 3. Weekly
 - a. With pump operating, pressure flush filter assembly. Continue flush operation until sample is clear, clean, and bright.
 - b. Time flow rate with full open flow from nozzle. Record gallons-per-minute to nearest 1/10 gallon.
 - c. Check condition of covers, gaskets, and vents.
 - d. Inspect all fire extinguishers for broken seals, proper pressure, and recharge date. Recharge as necessary.
 - e. Inspect hoses for abrasions, separations, or soft spots. Weak hoses will be replaced.
- Record Keeping. (Records to be kept with the Fuel Truck) The fuel handler shall keep a record containing the following information: (as a minimum)
 - a. Condition (clean, clear, bright, etc.) of fuel sample at:
 - 1. Nozzle
 - 2. Filter Sump
 - 3. Tank Sump
 - b. Flow rate in gallons per minute to the nearest 1/10 gallon
 - c. Filter change (reason & date)
 - d. Record of source, location, when and quantity of fuel loaded into servicing vehicle
 - e. Fuel servicing vehicle tank ports will be secured and locked to prevent access by unauthorized individuals.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

EXHIBIT 9 OPERATIONS AND SAFETY PROCEDURES GUIDE FOR HELICOPTER PILOTS

It is important for Contract pilots to be familiar with the Contract specifications. See Forest Service website: http://www.nifc.gov/aviation/helicopters.htm

Pilot operation briefings will emphasize the following areas:

- 1. Pilot Authority and Responsibility
- 2. Helicopter Management
- 3. Operational Requirements
- 4. Operating Limitations and Weather Requirements
- 5. FM Radio and GPS Operations
- 6. Flight Following and Flight Plans
- 7. Incident Airspace
- 8. Knowledge and Procedure Overview
- 9. Regional Procedures

EXHIBIT 11 HELICOPTER MAKE/MODEL/SERIES LIST

Grouping of like makes and models of aircraft allows determination of pilot authority. Differences training shall be completed for each of the makes/models in a grouping. Make/model qualification and currency are met with time flown in any aircraft in grouping.

When make/model/series currency is specified in the procurement document, only that specific make/model/series may be used to determine currency.

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

EXHIBIT 13 INTERAGENCY HELICOPTER LOAD CALCULATION

Instructions

A load calculation must be completed for all flights. A new calculation is required when operating conditions change (\pm 1000' in elevation or \pm 5°C in temperature) or when the Helicopter Operating Weight changes (such as changes to the Equipped Weight, changes in flight crew weight or a change in fuel load).

All blocks must be completed. Pilot must complete all header information and Items 1-13. Helicopter Manager completes Items 14 & 15.

1. DEPARTURE - Name of departure location and current Pressure Altitude (PA, read altimeter when set to 29 92) and Outside Air Temperature (OAT, in Celsius) at denarture location.

Weight Reduction value, for make & model, can be found in the current helicopter procurement document (contract).

- ADJUSTED WEIGHT Line 7b minus Line 8.
- 10. GROSS WEIGHT LIMITATION Enter applicable gross weight limit from Limitations section of the basic Flight Manual or the appropriate Flight Manual Supplement. This may be Maximum Gross Weight Limit for Take-Off and Landing, a Weight/Altitude/Temperature (WAT) limitation or a Maximum Gross Weight Limit for External Load (jettisonable). Limitations may vary for HIGE, HOGE and HOGE-J.
- 11. SELECTED WEIGHT The lowest weight, either line 9 or 10, will be entered for all loads. Applicable limitations in the Flight Manual must not be exceeded.
- 12. OPERATING WEIGHT Use the value entered in Line 6.
- 13. ALLOWABLE PAYLOAD Line 11 minus Line 12. The maximum allowable weight (passengers and/or cargo) that can be carried for the mission. Allowable Payload may differ for HIGE, HOGE and HOGE-J.
- 14. PASSENGERS AND/OR CARGO Enter passenger names and weights and/or type and weights of cargo to be transported. Include mission accessories, tools, gear, baggage, etc. A separate manifest may be used.
- 15. ACTUAL PAYLOAD Total of all weights listed in Item 14. Actual payload must not exceed Allowable Payload for the intended mission profile, i.e. HIGE, HOGE or HOGE-J.

Both Pilot and Helicopter Manager must review and sign the form. Check if HazMat is being transported. Manager must inform the pilot of type, quantity and location of HazMat onboard.

EXHIBIT 17 SUPPLEMENTAL RAPPEL REQUIREMENTS

AVIONICS

For Rappel Operations the following paragraphs in sections of C-8, Contractor Furnished Avionics Systems, are deleted and replaced with the following paragraphs:

E. Audio Control Systems

General

Two audio control systems (which may be combined in a single unit) shall be installed providing the pilot and observer/co-pilot separate systems. Each system shall provide pilot and observer/co-pilot with separate controls for selection of multiple receiver audio outputs and transmitter microphone/push-to-talk (PTT) audio inputs. Each system shall also provide pilot and observer/co-pilot with separate controls for adjustment of both ICS and receiver audio output levels.

For Heavy (Type I) and Medium (Type II) helicopters, a third audio control system shall be installed in the aft cabin for utilization by the rappel spotter. The audio control system shall be installed in a location that provides clear and unobstructed access by the spotter while seated in the spotter

G. Receiver Selection and Operation

Separate controls shall be provided for the pilot, observer/co-pilot, and spotter (if required), to select audio from one or any combination of available receivers.

All passengers shall be capable of monitoring receive audio. These positions shall monitor receive audio as selected by the spotter's audio control system (when installed) or the observer/co-pilot's audio control system. When additional audio control systems are installed, aft passengers shall monitor receive from the most logical audio control system.

RAPPEL ANCHOR

Source 1 Heli-Tech 190 S. Danebo Ave. Eugene, OR 97402 Tel. 541-344-2304

- STC No. SH261WE for Bell Medium Series
- STC No. SH4547NM for Bell 206L-4
- STC No. SR00125LA-D for Eurocopter AS350 Series (Floor mounted kit)

Source 2
Aeronautical Accessories, Inc.
P. O. Box 3689
Bistol, TN 37625
Tel. 423-538-5151

- STC No. SR01336AT for Bell 407
 - o In addition to STC No. SR01336AT for Bell 407 the Forest Service requires STC No. SH4547NM for the purpose of a spotter attachment point in this make and model.
- STC No. SH2293SO for Bell 206L-4 cargo let-down only

The FS has approved three non-STC'd anchors for use in Interagency operations (the FS has no control over the availability of these designs):

Ú	Sikorsky S-58ET (Aris Helicopters)
	Sikorsky S-58HT (Construction Helicopters)
	Sikorsky S-61N (Coulson Aircrane)

Rappel Anchor Inspection

The owner shall assure that the rappel anchor is in condition to perform. STC'd rappel anchor kits will have instructions for Continued Airworthiness.

The rappel anchors shall be visually inspected before and after each rappel operation. An annual inspection will also be conducted. The manufacturer of the anchor is responsible for developing a maintenance inspection, which ensures the continued airworthiness of the anchor. The owner of the anchor is responsible for ensuring that the inspection(s) are conducted. Critical inspection of metal components can be achieved using magnaflux, x-ray, sonics or dye-penetrate. No welding or major repairs will be accomplished without prior approval of a USDA Forest Service or Department of the Interior Contracting Officer. Major repairs shall only be performed by the STC holder or manufacturer.

All non-STC'd rappel anchors shall be fabricated in accordance with the motoriole appetited in the

SECTION C DESCRIPTION/SPECIFICATIONS/EXHIBITS

installation and any subsequent inspection periods. The anchor will be inspected as part of the helicopter equipment.

AMD-60B (12/06) / FS-5700-20b (pending)
CONTRACTOR'S VERIFICATION OF INDIVIDUAL HELICOPTER PILOT REQUIREMENTS AND EXPERIENCE FOR INITIAL
INTERAGENCY APPROVAL

Note: This form is required prior to initial (first-time) approval/carding. This form is not for pilots previously approved or carded by the USDA Forest Service or DOI, NBC Aviation Management (formerly Office of Aircraft Services).

The Contractor must ensure that a pilot who is presented for initial carding meets all requirements as outlined in the contract's Section B, Technical Specifications/Pilot Qualifications, after award. The Contractor must verify all pilot hours submitted on this form as determined from a certified pilot log or permanent record to ensure accuracy. In addition, the Contractor must identify previous employers and submit the information on this form. The information provided by the pilot on USES Form ES-5700-204 for

EXHIBIT 19

"On Contract" Pilot Operational Training

Pilot "operational training" may be accomplished "on contract" provided the following criteria are met.

- 1. Training shall not interfere with the Scope of the Contract (government will determine what constitutes interference). Note: Will be reviewed at pre-work conference.
- 2. Training may be suspended or terminated by the government at any time.
- 3. Contractor shall be responsible for all travel, per diem, and wage expenses of trainee pilots.
- 4. Contractor has an AMD / USFS approved "Pilot Operational Training Plan."
- 5. Contractor shall maintain "On Contract" training records documenting all phases of pilot training.
- 6. Training shall be accomplished only by an interagency approved "Pilot Trainer" meeting the following criteria:
 - A. Holds a current and valid CFI; Rotorcraft-Helicopter issued by the FAA, or is an FAA designated company check airman for their current employer
 - B. Has held an interagency pilot card for a minimum of 5 of the last 7 years.
 - C. Holds a current and valid Interagency Pilot Card endorsed for all missions in which training is to be provided.
 - D. Holds a current and valid Interagency Pilot Card endorsed "Designated Pilot Trainer."
 - E. Training Pilots are authorized to conduct training only for pilots holding an Interagency Pilot Card for the same designated contractor and endorsed "Trainee Only."
 - F. Training Pilots qualifications may be revoked at the government's discretion.
- 7. "Trainee" pilots shall meet the following criteria:
 - A. Meets all flight hour requirements* as outlined in C-12.D (with the following exceptions):
 - Operational Training flight hours may be used to satisfy all but the initial 10 hours of the required flight hours for "Weight Class."
 - ii. Operational Training flight hours may be used to satisfy all but the initial10 hours of the required flight hours for "Make and Model."
 - iii. Operational Training flight hours may be used to satisfy the required flight hours for "Mountain Flying Make and Model."
 - Operational Flight Training will not be used to accomplish the contractually required 10 flight hours of long-line training.

EXHIBIT 19

D-2 Certification of Toxic Chemical Release Reporting (FAR 52.223-13) (Aug 2003)

- (a) Executive Order 13148, of April 21, 2000, Greening the Government through Leadership in Environmental Management, requires submission of this certification as a prerequisite for contract award.
- (b) By signing this offer, the offeror certifies that-
 - (1) As the owner or operator of facilities that will be used in the performance of this contract that

D-4 Economic Price Adjustment Specified Flight Rate Contracts

(1) NON-FUEL PORTION OF THE SPECIFIED FLIGHT RATE

Contract rates will be established in accordance with the following to reflect increases or decreases in the cost of performance of the contract work. The increases or decreases used in establishing the rates will be those indicated by the changes in the following price indexes:

The Non-Fuel Portion of the Specified Flight rate will be affected by :

TABLE 6-PRODUCER PRICE INDEXES

- 1. Commodity Group 1423 -- Aircraft Engines and Engine Parts
- 2. Commodity Group 1425 -- Aircraft Parts and Auxiliary Equipment

AVERAGE OF PERCENT CHANGES X 100 PERCENT OF LAST ADJUSTED RATE

The new rate will be derived by multiplying the average of the percentage changes of (1) and (2) times the rate in effect for the year immediately prior to the year in which the renewal is effective. The result will be added to or subtracted from the existing rate to become the newly adjusted rate (rounded to the next dollar).

(2) FUEL PORTION OF THE SPECIFIED FLIGHT RATE

During the contract periods, including renewals, flight rates will be adjusted to reflect increases and decreases in the prices of aviation fuel.

The price of Jet fuel is established at \$5.36 per gallon. The unit prices are an average of the lowest unit price for aviation fuel Nationwide. Variations in unit prices used in determining flight rate adjustment amounts will be established by using the average of the lowest unit price for aviation fuel at the following locations:

- (i) MERCURY AVIATION (RENO AIR SERVICE), Fresno, CA
- (ii) CUTTER FL YING SERVICE, Albuquerque, NM
- (iii) CUTTER AVIATION, Phoenix, AZ
- (iv) FLIGHTCRAFT, Portland, OR
- (v) MILLIONAIRE, Salt Lake City, UT (Interwest Jet)
- (vi) WESTERN AIRCRAFT MAINTENANCE, Boise, ID
- (vii) MINUTEMAN AVIATION, Missoula, MT
- (viii) WEST STAR AVIATION, Grand Junction, CO
- (ix) MERCURY AVIATION (RENO AIR SERVICE), Reno, NV
- (x) WINGS OF WENATCHEE, Wenatchee, WA (xi) EPPS AVIATION, Atlanta, GA
- (xii) KNOXAIR, Alcoa, TN
- (xiii) TAC-AIR AVIATION, Ft. Smith, AR

The adjustment to the fuel portion of the flight rate will be the determined variation amount multiplied by the fuel consumption rates found in Exhibit 12, Helicopter Services Hourly Flight Rates, Fuel Consumption, and Weight Reduction Chart for the applicable aircraft type.

An initial adjustment to the fixed flight rate will be made on FEBRUARY 16 of each contract period. Subsequent adjustments will be made on MAY 16, and SEPTEMBER 16 of each contract period provided variations in the average unit price, determined as stated above, is \$0.10 per gallon or more from the unit price established in the last previous adjustment made.

(3) DAILY AVAILABILITY RATE

Economic Price Adjustment is not applicable to the Daily Availability Rates Offered by the Contractor in the Schedule of Items.

D-5 Property and Personal Damage

- (1) The Contractor shall use every precaution necessary to prevent damage to public and private property.
- (2) The Contractor shall be responsible for all damage to property and to persons, including third parties, that occur as a result of his or his agent's or employee's fault or negligence. The term "third parties" is construed to include employees of the Government.
- (3) The Contractor shall procure and maintain during the term of this contract, and any extension thereof, aircraft and General Public Liability Insurance in accordance with 14 CFR 205. The parties named insured under the policy or policies shall be the CONTRACTOR and THE UNITED STATES OF AMERICA.
- (4) The Contractor may be otherwise insured by a combination of primary and excess policies. Such olicies must have combined coverage equal to or greater than the combined minimums required.
- (5) Policies containing exclusions for chemical damage or damage incidental to the use of equipment and supplies furnished under this contract, or growing out of direct performance of the contract, will not be acceptable. The chemical damage coverage may be limited to chemicals dispensed while performing firefighting activities.
- (6) The Contractor, prior to the commencement of work, shall submit to the Contracting Officer one copy of the insurance policy, or confirmation from the insurance company, certifying that the coverage described in this clause has been obtained.

, ,

SECTION D CONTRACT CLAUSES

D-7 Optional-Use Period

Outside the Mandatory Availability Period and any extensions thereof, the Government may need service on an intermittent basis. Orders may be placed subject to acceptance by the Contractor. The Contractor may agree to provide service at the contract daily availability rate plus specified flight rate (applies to daily availability contracts only) or at the optional-use hourly flight rate. If accepted, all terms and conditions of the contract will apply.

D-8 Statement of Equivalent Rates for Federal Hires (FAR 52.222-42) (MAY 1989)

	In compliance with the Service Contract Act of 1965, an amended, and the regulations of the Secretary of Labor (29 CFR Par 4), this clause identifies the classes of service employees expected to be employed under the contract and states the wages and fringe benefits payable to each if they were

E-1 Instructions to Offeror-Commercial Items (FAR 52.212-1) (NOV 2007) (Tailored/Addenda)

As part of the above referenced FAR Provision, it is important to note that significant to (j) Data Universal Numbering System (DUNS) Number and (k) Central Contractor Registration, the requirement for information is relevant to this solicitation. (See www.arnet.gov for full text reference.)

- (a) Submission of offers. Your offer must consist of the following:
 - (1) Standard Form 1449, Solicitation/Contract/Order for Commercial Items, with blocks 17, and 30 completed by you.
 - (2) Section B Schedule of Items, Requirements and Prices with your proposed prices inserted in the appropriate spaces.
 - (3) Section E, Offeror Representations and Certifications Commercial Items (FAR 52.212-3), completed by you or electronically in accordance with the players

E-2 INSTRUCTIONS FOR THE PREPARATION OF BUSINESS AND TECHNICAL PROPOSALS

- (a) **General Instructions**. Proposals submitted in response to this solicitation shall be furnished in the following format with the numbers of copies as specified below.
 - (1) The proposal must include a **Part I- Business Proposal** and **Part II- Technical Proposal**. Each of the parts shall be separate and complete so that evaluation of one may be accomplished independently from evaluation of the other. The technical proposal must not contain reference to cost; however, resource information (such as equipment capability) must be contained in the technical proposal so that the contractor's understanding of the statement of work may be evaluated.
 - (2) The Government will evaluate proposals in accordance with the evaluation criteria set forth in Section E of this RFP.
 - (3) Offerors shall submit their proposal(s) in the following format and the quantities specified:
- 1 copy (1 original) of the business/cost proposal/SF 1449 Cover/Signature Page

PART II TECHNICAL PROPOSAL

Technical Proposal Instructions. The technical proposal will be used to make an evaluation and arrive at a determination as to whether the proposal will meet the requirements of the Government. Therefore, the technical proposal must present sufficient information to reflect a thorough understanding of the requirements and a detailed, description of the techniques, procedures and program for achieving the objectives of the specifications/statement of work. Proposals that merely paraphrase the requirements of the Government's specifications/statement of work, or use such phrases as "will comply" or "standard techniques will be employed" will be considered unacceptable and will not be considered further.

Separate Part II- Technical proposal into four subparts, one for each of the major technical evaluation factors. As a minimum, your technical proposal must clearly address (1) Aircraft Technical Capability, (2) Safety/Risk Management (3) Past Performance and (4) Organizational Experience:

SUB-PART 1

AIRCRAFT TECHNICAL CAPABILITY

Provide the following information for each proposed aircraft. If more than one helicopter is offered, fill out a separate attachment for each helicopter. Include helicopter Make, Model and Variant and Aircraft Registration Number.

- (a) Submit an Interagency Helicopter Load calculation for each aircraft, as per Exhibit 13 (see clause B-3, Aircraft Performance Specifications)
 - (1) The helicopter-equipped weight shall be based on the actual weighing of the aircraft and shall meet the following requirements:
 - The aircraft shall be weighed prior to submission of the bid

AND

- The weighing must take place within 24 calendar months prior to the beginning of the first mandatory availability period (MAP).
- (2) For the load calculation, the Equipped Weight <u>includes</u> the weight of a fixed tank or the weight of the empty bucket and any associated suspension hardware <u>(cables, connectors, etc.)</u>. See clause C 4 D.21 for reference
- (b) Submit copies of the following:
 - (1) Current 14 CFR Part 133 Operating Certificate and current FAA letter of authority for aircraft designated to operate under the 14 CFR Part 133 Operating Certificate. One copy will suffice.
 - (2) 14 CFR Part 135 Operating Certificate and current 14 CFR Part 135 Operations specifications (Sections A, and D). Each aircraft offered should be listed in Section D of the Operations Specification (as applicable). One copy will suffice.
 - (3) 14 CFR Part 137 Operating Certificate.
 - (4) Submit a current weight and balance for each aircraft offered as per C-5.

Amendment 01 Dated April 4, 2008

(5) Submit a current aircraft equipment list for each aircraft offered

(6) Performance Data shall be provided with your proposal for evaluation of the helicopters

(d) and that you were committed to customer satisfaction.

When evaluating your past performance we may contact other sources of information, including, but not limited to: Federal, State and local Government agencies.

Offerors who have not obtained Government contracts for helicopter services shall indicate their past experience and performance for related aviation services and include references for whom the services were performed.

SUB-PART 4

ORGANIZATIONAL EXPERIENCE

The opportunity to learn is by doing. Your experience is relevant when you have been confronted with the kinds of challenges that will confront you under this contract contemplated by this RFP. We will assess your relevant experience on the basis of its breadth and its depth. The Government prefers experience supporting wild land fire operations. In addition to overall organizational company experience, address the experience of your personnel directly responsible for working under this contract.

- (a) Management Personnel:
 Specifically, list qualifications and experience of management personnel required under FAR 119.
- (b) Pilot in Command (PIC):
 Submit the name(s) of the PIC(s) with the pilots experience using the FS 5700-20b in exhibit 18. The contractor shall verify all pilot hours (PIC) submitted on "Helicopter Pilot Qualification and Approval Record" form FS-5700-20a as determined from a certified pilot log or permanent record to ensure accuracy.

The contractor shall ensure that a pilot meets all requirements as outlined in paragraph C-12 D Pilot Requirements-Experience.

(c) Maintenance Personnel: Identify and submit existing and proposed maintenance personnel.

SECTION E SOLICITATION PROVISIONS

- (4) Organizational Experience
 - a) Management Personnel
 - b) Pilot in Command
 - c) Maintenance Personnel

The sub-factors are equal in importance

E-4 Contract Award

- (a) Awards will be made to those offerors whose proposals are technically acceptable and whose technical/price relationships are the most advantageous to the Government. The Government reserves the right to award any combination of items or number of items.
- (b) The offeror's technical proposal may become a part of any resultant contract. Offerors are hereby advised that the Government will have the right to use, duplicate, or disclose in any manner and for any purpose whatsoever, and have the right to permit others to do so, all subject data required to be delivered under any contract resulting from this solicitation. Any reservations regarding these Government rights to data should be stated in the proposal and will be resolved during any subsequent

E-5 Offeror Representations and Certifications-Commercial Items (FAR 52.212-3) (NOV 2007)

An offeror shall complete only paragraph (I) of this provision if the offeror has completed the annual presentations and certifications electronically at http://orca.bpn.gov. If an offeror has not completed the annual representations and certifications electronically at the ORCA website, the offeror shall complete only paragraphs (b) through (k) of this provision.

(a) Definitions. As used in this provision-

"Emerging small business" means a small business concern whose size is no greater than 50 percent of the numerical size standard for the NAICS code designated.

"Forced or indentured child labor" means all work or service—

- (1) Exacted from any person under the age of 18 under the menace of any penalty for its nonperformance and for which the worker does not offer himself voluntarily; or
- (2) Performed by any person under the age of 18 pursuant to a contract the enforcement of which can be accomplished by process or penalties.

"Manufactured end product" means any end product in Federal Supply Classes (FSC) 1000-9999, except-

- (1) FSC 5510, Lumber and Related Basic Wood Materials;
- (2) Federal Supply Group (FSG) 87, Agricultural Supplies;
- (3) FSG 88. Live Animals;
- (4) FSG 89, Food and Related Consumables;
- (5) FSC 9410, Crude Grades of Plant Materials;
- (6) FSC 9430, Miscellaneous Crude Animal Products, Inedible;

Amendment 01 Dated April 4, 2008

(7) FSC 9440, Miscellaneous Crude Agricultural and Forestry Products;

- (8) FSC 9610, Ores;
- (9) FSC 9620, Minerals, Natural and Synthetic; and
- (10) FSC 9630, Additive Metal Materials.

"Place of manufacture" means the place where an end product is assembled out of components, or otherwise made or processed from raw materials into the finished product that is to be provided to the Government. If a product is disassembled and reassembled, the place of reassembly is not the place of manufacture.

"Service-disabled veteran-owned small business concern"-

- (1) Means a small business concern—
 - (i) Not less than 51 percent of which is owned by one or more service-disabled veterans or, in the case of any publicly owned business, not less than 51 percent of the stock of which is owned by one or more service-disabled veterans; and
 - (ii) The management and daily business operations of which are controlled by one or more service-disabled veterans or, in the case of a service-disabled veteran with permanent and severe disability, the spouse or permanent caregiver of such veteran.
- (2) Service-disabled veteran means a veteran, as defined in 38 U.S.C. 101(2), with a disability that is service-connected, as defined in 38 U.S.C. 101(16).

"Small business concern" means a concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on Government contracts, and qualified as a small business under the criteria in 13 CFR Part 121 and size standards in this solicitation.

"Veteran-owned small business concern" means a small business concern-

- (1) Not less than 51 percent of which is owned by one or more veterans (as defined at 38 U.S.C. 101(2)) or, in the case of any publicly owned business, not less than 51 percent of the stock of which is owned by one or more veterans; and
- (2) The management and daily business operations of which are controlled by one or more veterans.

(b) Taxpayer Identification Number (TIN) (26 U.S.C. 6109, 31 U.S.C. 7701). (Not applicable if the offeror is required to provide this information to a central contractor registration database to be eligible for award.)
(1) All offerors must submit the information required in paragraphs (b)(3) through (b)(5) of this provision to comply with debt collection requirements of 31 U.S.C. 7701(c) and 3325(d), reporting requirements of 26 U.S.C. 6041, 6041A, and 6050M, and implementing regulations issued by the Internal Revenue Service (IRS).
(2) The TIN may be used by the Government to collect and report on any delinquent amounts arising out of the offeror's relationship with the Government (31 U.S.C. 7701(c)(3)). If the resulting contract is subject to the payment reporting requirements described in FAR 4.904, the TIN provided hereunder may be matched with IRS records to verify the accuracy of the offeror's TIN. (3) Taxpayer Identification Number (TIN).
TIN:TIN:TIN:TIN:TIN:
☐ TIN is not required because:
Offeror is a nonresident alien, foreign corporation, or foreign partnership that does not have income effectively connected with the conduct of a trade or business in the United States
and does not have an office or place of business or a fiscal paying agent in the United States;
☐ Offeror is an agency or instrumentality of a foreign government;
Offeror is an agency or instrumentality of the Federal Government.
(4) Type of organization.
Sole proprietorship;
Partnership;
Corporate entity (not tax-exempt); Corporate entity (tax-exempt);
Government entity (Federal, State, or local);
Foreign government;
International organization per 26 CFR 1.6049-4;
Other
(5) Common parent.
☑Offeror is not owned or controlled by a common parent;
☐ Name and TIN of common parent:
Name
TIN
(c) Offerors must complete the following representations when the resulting contract will be performed in the United States or its outlying areas. Check all that apply.
(1) Small business concern. The offeror represents as part of its offer that it ⋈ is, ☐ is not a small
business concern.
(2) Veteran-owned small business concern. [Complete only if the offeror represented itself as a small business concern in paragraph (c)(1) of this provision.] The offeror represents as part of its offer that it ☐ is, ☒ is not a veteran-owned small business concern.
(3) Service-disabled veteran-owned small business concern. [Complete only if the offeror
represented itself as a veteran-owned small business concern in paragraph (c)(2) of this
provision.] The offeror represents as part of its offer that it \(\sigma\) is, \(\mathbb{X}\) is not a service-disabled
veteran-owned small business concern. Amendment 01
Dated April 4, 2008

	SOLICITATION PROVISIONS
	 (4) Small disadvantaged business concern. [Complete only if the offeror represented itself as a small business concern in paragraph (c)(1) of this provision.] The offeror represents, for general statistical purposes, that it o is, o is not a small disadvantaged business concern as defined in 13 CFR 124.1002. (5) Women-owned small business concern. [Complete only if the offeror represented itself as a small business concern in paragraph (c)(1) of this provision.] The offeror represents that it ☐ is,
	Note: Complete paragraphs (c)(6) and (c)(7) only if this solicitation is expected to exceed the simplified acquisition threshold. (6) Women-owned business concern (other than small business concern). [Complete only if the
	offeror is a women-owned business concern and did not represent itself as a small business concern in paragraph (c)(1) of this provision.] The offeror represents that it o is a women-owned business concern.
	(7) Tie bid priority for labor surplus area concerns. If this is an invitation for hid small business

- (i) The services under the contract are offered and sold regularly to non-Governmental customers, and are provided by the offeror (or subcontractor in the case of an exempt subcontract) to the general public in substantial quantities in the course of normal business operations;
- (ii) The contract services will be furnished at prices that are, or are based on, established catalog or market prices (see FAR 22.1003-4(d)(2)(iii));
- (iii) Each service employee who will perform the services under the contract will spend only a small portion of his or her time (a monthly average of less than 20 percent of the available hours on an annualized basis, or less than 20 percent of available hours during the contract period if the contract period is less than a month) servicing the Government contract; and
- (iv) The compensation (wage and fringe benefits) plan for all service employees performing work under the contract is the same as that used for these employees and equivalent employees servicing commercial customers.
- (3) If paragraph (k)(1) or (k)(2) of this clause applies—
 - (i) If the offeror does not certify to the conditions in paragraph (k)(1) or (k)(2) and the Contracting Officer did not attach a Service Contract Act wage determination to the solicitation, the offeror shall notify the Contracting Officer as soon as possible; and
 - (ii) The Contracting Officer may not make an award to the offeror if the offeror fails to execute the certification in paragraph (k)(1) or (k)(2) of this clause or to contact the Contracting Officer as required in paragraph (k)(3)(i) of this clause.
- (I)(1) Annual Representations and Certifications. Any changes provided by the offeror in paragraph (I)(2) of this provision do not automatically change the representations and certifications posted on the Online Representations and Certifications Application (ORCA) website.

[Offeror to identify the applicable paragraphs at (b) through (k) of this provision that the offeror has completed for the purposes of this solicitation only, if any.

These amended representation(s) and/or certification(s) are also incorporated in this offer and are current, accurate, and complete as of the date of this offer.

Any changes provided by the offeror are applicable to this solicitation only, and do not result in an update to the representations and certifications posted on ORCA.]
